

**Inoffizielles Handbuch
für Software AG's
NATURAL 3.1.1**

Natural Fehlermeldungen 3.1.1

NAT0001	<p>Falsche Syntax oder Reihenfolge; unbekannter Feldname.</p> <p>Missing/invalid syntax; undefined variable name/keyword.</p> <p>The syntax checker detected an invalid statement name or keyword. Probable cause is a misspelling of a statement name, keyword or variable name, or an error in a sub-clause of the previous statement.</p> <p>Correct Error.</p>
NAT0002	<p>Keine Datei mit angegebenem Namen oder Nummer vorhanden.</p> <p>No file is available with specified name or number.</p> <p>- The file name was misspelt; or - the file is not defined in the Data Dictionary; or - you are not authorized for access to the file.</p> <p>Use a correct file name; or define the file in the Data Dictionary or contact your NATURAL administrator for access authorization to the file.</p>
NAT0003	<p>Ungültiger Dateiname oder ungültige Dateinummer.</p> <p>Invalid character string for file name or file number.</p> <p>An invalid syntax has been supplied where NATURAL expected to locate a file name or number.</p> <p>Only characters that are available in the construction of variable names may be used for the construction of a file name, i.e., alphabetical characters (first character must be alphabetical), numeric characters, and the following special characters:</p> <p>- hyphen _ underscore @ at / slash # hash or pound \$ dollar & ampersand</p> <p>Eliminate invalid characters from file identification.</p>

Natural Fehlermeldungen 3.1.1

NAT0004	<p>Wenn verwendet, muß DEFINE DATA das 1. Statement sein.</p>
	<p>DEFINE DATA must be the first statement if present.</p> <p>If DEFINE DATA is used in a program, it must always be the first statement.</p> <p>Correct error.</p>
NAT0005	<p>Schließende Klammer fehlt in arithm./logischem Ausdruck.</p>
	<p>Closing parenthesis missing in arithmetic/logical expression.</p> <p>Parentheses may be used to control the evaluation of arithmetic and logical expressions.</p> <p>If parentheses are used, they must always be paired (opening and closing parentheses).</p> <p>Check the use of parentheses in the arithmetic or logical expres</p>
NAT0006	<p>ESCAPE wurde benutzt, obwohl keine Schleife aktiv war.</p>
	<p>ESCAPE statement used when no processing loop active.</p> <p>The ESCAPE statement may only be used within an active processing loop.</p> <p>Check structure of processing loops and place ESCAPE statement correctly within an active loop.</p>
NAT0007	<p>Falsche THRU-Klausel in READ LOGICAL-/HISTOGRAM-Statement.</p>
	<p>Invalid THRU clause in READ LOGICAL/HISTOGRAM statement.</p> <p>When specifying the THRU clause in a READ LOGICAL or HISTOGRAM statement, an ending value must be supplied.</p> <p>The ending value must be either a constant or the content of a variable.</p> <p>Correct error in program.</p>
NAT0008	<p>Unerlaubte Such-Syntax; Feld ist kein Deskriptor.</p>

Natural Fehlermeldungen 3.1.1

	<p>Invalid search syntax.</p> <p>1) A field used in a WITH clause must be a descriptor. A group notation is not permitted.</p> <p>2) When the ENDING AT clause of a READ statement uses a superdescriptor as the search key, the superdescriptor must be defined with the VIEW in the data area (if present).</p> <p>3) When the READ statement is related to DB2, the search variable must be part of the VIEW.</p> <p>1) The LIST FILE command may be used to ascertain whether a field is defined as a descriptor in the Data Dictionary. 2) Add superdescriptor to the VIEW.</p>
NAT0009	Falscher Operator in relationalem Ausdruck.
	<p>Invalid relational operator in a relational expression.</p> <p>A relational expression in a logical criterion contains an invalid relational operator. The following relational operators may be used in a relational expression:</p> <p>= or EQ or EQUAL TO ^= or NE or NOTEQUAL > or GT or GREATER THAN >= or GE or GREATER EQUAL</p> <p>Correct construction of relational expression.</p>
NAT0010	Fehler bei Wertangabe in relationalem Ausdruck.
	<p>Error in value specification in a relational expression.</p> <p>The search criterion is correct up to the relational operator, but the specification of the value to be compared is either missing or invalid.</p> <p>If the value was specified using a variable, the variable must have been previously defined.</p> <p>Ensure that alpha descriptor values are enclosed in apostrophes and that numeric values are not.</p> <p>Reference only variables that have been defined previously.</p>

Natural Fehlermeldungen 3.1.1

NAT0011	<p>Unerlaubte Format-Kombination in relationalem Ausdruck.</p> <p>Invalid format combination in a relational expression.</p> <p>In a relational expression, values being compared with a relational operator must have the same format, that is:</p> <p>alpha rel-operator alpha numeric rel-operator numeric binary rel-operator binary</p> <p>Correct error.</p>
NAT0012	<p>Längenanpassung der Suchvariablen nicht möglich.</p> <p>Length adjustment of search variable not possible.</p> <p>The value supplied in the relational expression is longer than t length defined for the search variable. The length of the search variable can be dynamically adjusted to the length of the value if only one value exists. (This is not true for expressions usin 'OR =', 'THRU' or 'BUT NOT' operations.)</p> <p>If more than one value exists, use appropriate length specificat for search variable.</p>
NAT0013	<p>Deskriptorname oder ISN fehlt nach BY in READ-Statement.</p> <p>Descriptor name or ISN missing after 'BY' in READ.</p> <p>The word 'BY' is specified to express a sequence for a READ oper If BY is used, either the word 'ISN' or the name of a descriptor must be specified to express the sequence in which the records a to be read.</p> <p>Either do not specify BY, or specify either ISN or the name of a descriptor.</p>
NAT0014	<p>Fehler in SORTED BY-Klausel eines FIND-Statements.</p>

Natural Fehlermeldungen 3.1.1

	Error in SORTED BY clause of FIND statement. The field specified for an ADABAS sort is not a descriptor; or no sort descriptor was specified; or more than 3 sort fields were specified. Correct error.
NAT0015	Klammern in Angabe von NATURAL-Systemfunktion fehlen. Parenthesis missing in NATURAL system function notation. The argument for a NATURAL system function must be enclosed in parentheses. If a variable has been given a name which is also the name of a NATURAL system function, this error message will also occur. Either enclose the argument for the function in parentheses; or change the name of the variable so that it does not conflict with the name of a NATURAL system function.
NAT0016	Falscher Parameter in INCLUDE-Statement oder Copycode. Invalid parameter in INCLUDE statement or copycode. The number of a parameter in the copycode Correct error in INCLUDE statement or in copycode.
NAT0017	MASK oder SCAN falsch angegeben, oder Maskenlänge falsch.

Natural Fehlermeldungen 3.1.1

	<p>MASK or SCAN used incorrectly, or incorrect mask length.</p> <p>MASK and SCAN can only be specified following an EQ or NE operator. Length of mask must be less than or equal to the length of the field.</p> <p>Only the following characters may be used in a mask:</p> <ul style="list-style-type: none">. ignore position in variable X check against positionU check for upper-case alpha L check for lower-case alphaN check for numeric C check for alphanumericH check for hexadec. char. S check for special printP check for printable char. A check for upper/lower alphaDD check for valid day in monthMM check for valid month in yearYY check for valid current yearYYYY check for valid year in centuryN1-N2 check against range of values <p>Ensure that the mask is specified correctly.</p>
NAT0018	Fehler bei Angabe eines arithmetischen Operanden.
	<p>Error in construction of arithmetic operand.</p> <p>The name of a variable has been misspelt in an arithmetic expression; or a wrong character has been used in the construction of a numeric constant; or the argument of a square root function has been constructed incorrectly.</p> <p>Check program and correct error.</p>
NAT0019	Fehlerhaftes Ergebnisfeld in arithmetischem Statement.

Natural Fehlermeldungen 3.1.1

	<p>Error in receiving field of arithmetic statement.</p> <p>The receiving field of an arithmetic operation must consist of a valid variable reference.</p> <p>The error may be caused by a misspelt variable name or by not supplying the character '=' in ASSIGN/COMPUTE. It can also appear if the target variable is a system function like INT, SIN, etc.</p> <p>Ensure that the target field of MULTIPLY/DIVIDE is not a constant.</p> <p>Check program and correct error.</p>
NAT0020	Schlüsselwort 'BY' fehlt in MULTIPLY-Statement.
	<p>Word 'BY' missing in MULTIPLY statement.</p> <p>In a MULTIPLY statement, the word 'BY' is required between the two operands to be multiplied, for example:</p> <p>MULTIPLY 1 BY 2 GIVING #RESULT</p> <p>Check program and correct error.</p>
NAT0021	Schlüsselwort 'INTO' fehlt in DIVIDE-Statement.
	<p>Word 'INTO' missing in DIVIDE statement.</p> <p>In a DIVIDE statement, the two operands must be separated by the word 'INTO', for example:</p> <p>DIVIDE 2 INTO 7 GIVING #RESULT</p> <p>Check program and correct error.</p>
NAT0022	Schlüsselwort 'TO' fehlt in MOVE-Statement.

Natural Fehlermeldungen 3.1.1

	<p>Word 'TO' missing in MOVE statement.</p> <p>The word 'TO' is required in a MOVE statement to indicate the result field(s) into which the values are to be moved.</p> <p>Examples: MOVE 1 TO #A MOVE #B TO #C #D #E #F</p> <p>Check program and correct error.</p>
NAT0023	<p>Fehler bei Angabe eines Format-Elements.</p> <p>Error in specification of format element.</p> <p>Error in the specification of a format element: either in the FORMAT statement, or in a format specification following an input/output statement or an individual element.</p> <p>Format elements must be identified using the proper format element keywords.</p> <p>See the NATURAL Reference Manual, NATURAL Session Parameters, for details.</p> <p>Check program and correct error.</p>
NAT0024	<p>Im VERT-Modus muß auf AS entweder 'text' oder CAP folgen.</p> <p>In VERT mode, 'AS' must be followed by 'text' or 'CAP'.</p> <p>DISPLAY VERTICALLY AS indicates that a special option is desired the vertical display of elements.</p> <p>None of these options were encountered, either because of a miss or because no options were provided.</p> <p>Possible options are:</p> <ul style="list-style-type: none">- DISPLAY VERTICALLY AS 'header text'- DISPLAY VERTICALLY AS CAPTIONED (or DISPLAY VERTICALLY AS C)- DISPLAY VERTICALLY AS 'header text' CAPTIONED <p>See NATURAL Reference Manual for details.</p> <p>Check program and correct error.</p>

Natural Fehlermeldungen 3.1.1

NAT0025	<p>Schließende Klammer fehlt im Argument der Systemfunktion.</p> <p>Closing parenthesis missing in system function argument.</p> <p>In a SORT statement, multiple argument variables can be specified for the same NATURAL system function.</p> <p>The list of argument variables must be enclosed in parentheses for all argument fields that are to be evaluated for the same system function.</p> <p>Check program and correct error.</p>
NAT0026	<p>Ausgabeelement nach VERT fehlt oder ist falsch.</p> <p>Output element after 'VERT' is missing or invalid.</p> <p>'VERT(ICALLY)' was specified in a DISPLAY statement to indicate output elements are to be displayed underneath one another; however no valid output element was encountered after the 'VERT'. You have probably misspelt a variable name or forgotten an apostrophe at the beginning of a text string.</p> <p>Check program and correct error.</p>
NAT0027	<p>Fehlerhafte Wertangabe.</p> <p>Error in value specification.</p> <p>A value may be specified either as a constant or as the reference to an already existing variable or database field.</p> <p>Either a misspelt variable name was supplied, or the leading apostrophe for a constant was omitted.</p> <p>Correct error.</p>
NAT0028	<p>Deskriptor fehlt bei READ LOGICAL-Statement.</p>

Natural Fehlermeldungen 3.1.1

	<p>READ LOGICAL used without required descriptor.</p> <p>A READ LOGICAL statement requires the specification of a descriptor which is to be used to control the read sequence. If no sequence is specified in the READ LOGICAL statement, NATURAL attempts to use the default sequence as defined for the in the Data Dictionary.</p> <p>If no descriptor is specified in the READ LOGICAL statement, and no default sequence is defined in the Data Dictionary, this error message will be displayed.</p> <p>Ensure that the sequence descriptor is specified by either of the methods described above.</p>
NAT0029	Deskriptor fehlt / falsche Syntax in HISTOGRAM-Statement.
	<p>Descriptor field missing/invalid syntax in HISTOGRAM.</p> <p>A HISTOGRAM statement reads the values for a descriptor. The values are read using the database inverted list. Therefore, only descriptor fields may be specified.</p> <p>Supply a valid descriptor.</p>
NAT0030	Relationaler Ausdruck fehlt oder ist ungültig.
	<p>A relational expression is missing or invalid.</p> <p>Valid relational expressions are:</p> <ul style="list-style-type: none">= or EQ or EQUAL TO^= or NE or NOTEQUAL> or GT or GREATER THAN>= or GE or GREATER EQUAL <p>See NATURAL Reference Manual, Logical Condition Criteria, for de</p> <p>Correct Error.</p>
NAT0031	Öffnende/schließende Klammer fehlt bei REDEFINE.

Natural Fehlermeldungen 3.1.1

	<p>Opening/closing parenthesis missing in REDEFINE.</p> <p>Opening and closing parentheses are required to begin/end the definition of a new variable using REDEFINE.</p> <p>Example: REDEFINE #A (#A(N3) #A2(A7))</p> <p>Correct error.</p>
NAT0032	<p>Fehler bei Kontrollvariable für AT BREAK-Statement.</p> <p>Invalid control field specified in AT BREAK statement</p> <p>In an AT BREAK statement, database fields or user-defined variables may be used to indicate the control field.</p> <p>If a user-defined variable is used, it must have been previously defined.</p> <p>Correct error.</p>
NAT0033	<p>ACCEPT/REJECT nur in aktiver Datenbank-Schleife erlaubt.</p> <p>ACCEPT/REJECT can only be used in active database loop.</p> <p>ACCEPT/REJECT can only be used within an active processing loop that reads data from the database. The loop must have been initiated by a FIND, READ or HISTOGRAM statement, and it must not be closed prior to the ACCEPT or REJECT statement.</p> <p>Place loop-closing statement (LOOP, END-FIND, END-READ, etc.) correctly after the ACCEPT/REJECT statement.</p>
NAT0034	<p>Numerisches Feld für Zeilenanzahl fehlt/ist ungültig.</p> <p>Numeric field for number of lines invalid or missing.</p> <p>The number of lines to be skipped in a SKIP, EJECT or NEWPAGE statement must be specified with a numeric constant or variable.</p> <p>Check program and correct error.</p>
NAT0035	<p>Schlüsselwort 'DATA' oder 'PAGE' fehlt.</p>

Natural Fehlermeldungen 3.1.1

	<p>'DATA' not in AT START OF DATA/'PAGE' in AT TOP OF PAGE.</p> <p>The word 'DATA' is required in the construction of an AT START O statement; the word 'PAGE' is missing in an AT TOP OF PAGE state. It has either been misspelt or forgotten.</p> <p>Check program and correct error.</p>
NAT0036	<p>Fehler in Angabe von '/n/' bei 'AT BREAK ... /n/'.</p> <p>Error in '/n/' specification of 'BREAK OF ... /n/'.</p> <p>The option '/n/' in the construction of a logical break condition must be a numeric constant enclosed in slashes (/) without any leading or trailing blank characters.</p> <p>Example: IF BREAK OF BIRTH /2/</p> <p>Check program and correct error.</p>
NAT0037	<p>Programmname in CALL-Statement fehlt / falsch angegeben.</p> <p>Name missing or specified incorrectly.</p> <p>This error occurs under one of the following conditions:</p> <ul style="list-style-type: none">- The program name specified in a CALL or CALLNAT statement is incorrect.- The dialog name specified in an OPEN DIALOG statement is incorrect. <p>Specify the name as a 1-to 8-character constant or as a variable of format A8.</p>
NAT0038	<p>Falscher Feldname für das Basisfeld in REDEFINE-Anweisung.</p> <p>Invalid field reference in REDEFINE base field.</p> <p>The field to be used as the base field in a REDEFINE statement must be a user-defined variable or a database field.</p> <p>If it is a user-defined variable, it must have been previously defined.</p> <p>If it is a database field, it must be a field within an active I</p> <p>Check program and correct error.</p>
NAT0039	<p>Summe der Felder in REDEFINE ist länger als das Basisfeld.</p>

Natural Fehlermeldungen 3.1.1

	<p>Sum of field lengths in REDEFINE > length of base field.</p> <p>The accumulated length of all new fields in a REDEFINE statement must be less than or equal to the length of the base field, counted bytes.</p> <p>Check program and correct error.</p>
NAT0040	<p>Pro Report ist nur ein AT TOP OF PAGE-Statement erlaubt.</p> <p>Only one AT TOP OF PAGE statement allowed per report.</p> <p>The AT TOP OF PAGE statement may only be specified once for the report. If multiple actions are to be executed at the top of a page depending on various conditions, they must be specified within the same AT TOP OF PAGE statement and separated by the appropriate logical conditions.</p> <p>Check program and correct error.</p>
NAT0041	<p>Pro Report ist nur ein AT END OF PAGE-Statement erlaubt.</p> <p>Only one AT END OF PAGE statement allowed per report.</p> <p>The AT END OF PAGE statement may be specified only once per report. If multiple actions are desired under the same end-of-page condition, they must be specified within the same AT END OF PAGE statement and separated by the appropriate logical conditions.</p> <p>Check program and correct error.</p>
NAT0042	<p>Chiffrierschlüssel (Cipher Code) wurde falsch angegeben.</p> <p>Invalid specification of CIPHER code.</p> <p>The cipher code for a database file may be specified either as a numeric constant (8 digits) or the content of a numeric variable. The numeric variable must be defined with format/length N8. An equal sign (=) must be specified between the word CIPHER and the value.</p> <p>If the value is supplied via a numeric variable, this numeric variable cannot be a REDEFINE variable.</p> <p>Check program and correct error.</p>

Natural Fehlermeldungen 3.1.1

NAT0043	<p>Passwort ist nicht alphanumerisch oder falsch definiert.</p> <p>Invalid password construction.</p> <p>The ADABAS password may be provided as an alphanumeric constant or by using an alphanumeric variable. An equal sign (=) must be specified between the word PASSWORD and the value for the password.</p> <p>Check program and correct error.</p>
NAT0044	<p>Ausgabeelement nicht definiert oder ungültiger Index.</p> <p>Output element not defined, or indexes incorrect.</p> <p>This error may be caused by:</p> <ul style="list-style-type: none">- an error in the construction of the name of an output element;- a reference to a variable that has not been previously defined- a misspelling of a keyword;- an invalid index specification. <p>Check program and correct error.</p>
NAT0045	<p>Ungültige Referenzierung in UPDATE- bzw. DELETE-Statement.</p> <p>Invalid reference in UPDATE or DELETE statement.</p> <p>Either the construction of the reference is wrong or the reference is not allowed. A reference can only be made to a FIND, GET or READ statement. An UPDATE, GET or DELETE statement must not be on the same line FIND statement. No reference is possible to a GET SAME statement. In this case, use a reference to the statement that made the first access to the record.</p> <p>Check for the above causes and correct any errors.</p>
NAT0046	<p>Fehlerhafte Parameterliste in UPDATE-/STORE-Statement.</p>

Natural Fehlermeldungen 3.1.1

	<p>Error in parameter field list for UPDATE or STORE.</p> <p>Only fields from one file may be updated with one UPDATE or STORE statement. Values for fields may be constants, the contents of user-defined variables, or the contents of a database fields.</p> <p>Check the parameter list and correct any errors.</p>
NAT0047	<p>Fehler in Variablendefinition.</p> <p>Error in variable definition.</p> <p>One of the following errors was detected:</p> <ul style="list-style-type: none">- In an OBTAIN statement, the field referenced was not contained within a database array.- An error in a statement reference and/or field length notation was detected.- An error in the index notation was detected. <p> OBTAIN ARRAY (1:5) -> valid OBTAIN ARRAY (#I:#J) -> INVALID OBTAIN ARRAY (#I:#I + 9) -> valid</p> <p>Correct error.</p>
NAT0048	<p>Unerlaubte Formatkombination in UPDATE-/STORE-Statement.</p> <p>Illegal format combination of field/value in UPDATE/STORE.</p> <p>The value assignment for field/value combinations in the parameter list is performed individually for each combination according to the general rules for value assignment.</p> <p>An attempt was made to assign a value of one format to a field of incompatible format.</p> <p>Check program and correct error.</p>
NAT0049	<p>Fehlerhafte Wertangabe in UPDATE- bzw. STORE-Statement.</p>

Natural Fehlermeldungen 3.1.1

	<p>Error in value entry for UPDATE or STORE.</p> <p>The value in an UPDATE or STORE statement may be specified as a or as the content of a user-defined variable or database field. If a database field is used as a value, it must reference a current active FIND/READ/GET loop.</p> <p>Check program and correct error.</p>
NAT0050	<p>Fehler in Referenzierung bei GET SAME-Statement.</p>
	<p>Error in reference for GET SAME statement.</p> <p>The GET SAME statement refers by default to the last active access to the database; a reference to another specific database may be explicitly specified.</p> <p>If an explicit reference is used, the database access must still be active.</p> <p>Correct the error in the GET SAME reference.</p>
NAT0051	<p>Falsche Feld-Referenzierung in GET-Statement.</p>
	<p>Error in field reference in GET statement.</p> <p>One of the following errors was detected in a GET statement:</p> <ul style="list-style-type: none">- A field referenced is not contained in the specified file.- An invalid index notation for a database array was used. <p>Check program and correct error.</p>
NAT0052	<p>Ungültiger ISN-Wert in GET- bzw. READ-Statement.</p>
	<p>Invalid ISN value specified in GET or READ statement.</p> <p>The ISN value in a GET or READ statement must be specified as an integer numeric constant, a user-defined variable, or via the system variable *ISN.</p> <p>If you use *ISN, you must specify the statement label or source-line number (r) of the database statement that was used to originally read the record with that ISN.</p> <p>Correct error in program.</p>
NAT0053	<p>WRITE TITLE/TRAILER ist nur einmal pro Report erlaubt.</p>

Natural Fehlermeldungen 3.1.1

	<p>No more than one WRITE TITLE/TRAILER allowed per report.</p> <p>Only one WRITE TITLE statement and one WRITE TRAILER statement may be specified per report.</p> <p>Check the report references of the WRITE TITLE/TRAILER statement.</p>
NAT0054	<p>Falsche Angabe einer NATURAL-Systemfunktion.</p> <p>Error in entry for NATURAL system function.</p> <p>A NATURAL system function is indicated by an asterisk (*). The name of a valid NATURAL system function must follow the asterisk.</p> <p>Example: MOVE *MAX (SALARY) TO RICHPERSON</p> <p>Check program and correct error.</p>
NAT0055	<p>Fehlerhaftes Argument in einer NATURAL-Systemfunktion.</p> <p>Error in argument variable for NATURAL system function.</p> <p>The argument entry for a NATURAL system function may be a previously defined user-defined variable, or a database field.</p> <p>Check program and correct error.</p>
NAT0056	<p>Falsche Verwendung eines SORT-Statements.</p> <p>SORT statement used incorrectly.</p> <p>The SORT statement may only be used within an active processing loop.</p> <p>A SORT statement may not be placed within a processing loop that was initiated by another SORT statement.</p> <p>If a program contains multiple SORT statements, all must include a USING clause.</p> <p>Correct error.</p>
NAT0057	<p>Ungültige Limit-Angabe in WITH LIMIT-Klausel.</p>

Natural Fehlermeldungen 3.1.1

	<p>Invalid number specified in WITH LIMIT clause.</p> <p>The number representing the limit of records selected for further processing was specified incorrectly. It may be specified either as a numeric constant or as the content of a numeric variable that has been previously defined; for example:</p> <p style="padding-left: 40px;">WITH LIMIT (123) or WITH LIMIT (#LMT)</p> <p>Correct error in program.</p>
NAT0058	Anzahl der zu lesenden Datensätze ist falsch angegeben.
	<p>Number of records to be processed not specified correctly.</p> <p>The number of records to be processed in a processing loop initiated by FIND, READ or HISTOGRAM statement may be limited. The limit is specified as (n) where n is either a numeric constant or the name of a previously defined numeric variable.</p> <p>Correct error.</p>
NAT0059	Falsche Feldangabe in WHERE-Klausel.
	<p>Incorrect field specification in WHERE clause.</p> <p>Probable causes of this message are:</p> <ul style="list-style-type: none">- an error in the specified name;- a reference to a NATURAL system function which has not yet been evaluated;- a new variable has been defined where not allowed. <p>Correct error.</p>
NAT0060	Falsche Variablenangabe in logischem Ausdruck.
	<p>Incorrect variable specification in logical criteria.</p> <p>The left portion of a relational expression was specified incorrectly.</p> <p>This error may be caused by misspelling a variable name or keyword in a statement that follows the relational expression.</p> <p>Check program and correct error.</p>

Natural Fehlermeldungen 3.1.1

NAT0061	<p>Fehler in GIVING-Wert von ADD/SUBTRACT/MULTIPLY/DIVIDE.</p> <p>Error in GIVING value of ADD/MULTIPLY/SUBTRACT/DIVIDE.</p> <p>After the word 'GIVING' in an ADD, MULTIPLY, SUBTRACT or DIVIDE statement, a valid notation for a variable reference must be specified. A user-defined variable or a database field may be used.</p> <p>Correct error.</p>
NAT0062	<p>Ungültiges Feld nach 'TO' in MOVE-Statement.</p> <p>Invalid receiving field in MOVE statement.</p> <p>A valid notation for a variable reference must be specified after the word 'TO' in a MOVE statement.</p> <p>A user-defined variable or a database field may be used.</p> <p>MOVE LEFT/RIGHT JUSTIFIED is not allowed, if the receiving field is a system-variable.</p> <p>Correct error.</p>
NAT0063	<p>Ungültiges Argument in NATURAL-Systemfunktion.</p> <p>Error in the argument for a NATURAL system function.</p> <p>The argument for a system function in a WRITE or DISPLAY statement following an AT BREAK/END DATA condition was specified incorrectly. Either a user-defined variable or a database field may be used.</p> <p>If a user-defined variable is used, it must have been previously defined.</p> <p>If a database field is used, it must be available within an active processing loop.</p> <p>For a database field which is contained within an array, a single (one-dimensional array) or a range of indexes (two-dimensional array) may be used.</p> <p>Check program and correct error.</p>
NAT0064	Parameter-Fehler in CALL-Statement.

Natural Fehlermeldungen 3.1.1

	<p>Parameter error in CALL statement.</p> <p>The parameter values in CALL statements may be specified as numeric or alphanumeric constants, user-defined variables, or database fields.</p> <p>If database fields are used, they must be derived from an active database access.</p> <p>Indexes for database fields contained in an array may be specified as a single index or a range of indices.</p> <p>Check program and correct error.</p>
NAT0065	Gruppen- oder Periodengruppenausgabe nur im HORIZ-Modus.
	<p>Group or periodic group referenced in VERT mode.</p> <p>Groups and periodic groups may only be referenced in a DISPLAY statement in HORIZONTAL mode because a group needs a layout of columns that requires multiple lines.</p> <p>Make sure that the display mode is set to 'HORIZ' before referencing a group or periodic group.</p> <p>Check program and correct error.</p>
NAT0066	Fehler bei Konstantenangabe in LIMIT-Statement.
	<p>Error in constant specification for LIMIT statement.</p> <p>The value for the LIMIT statement may be specified as a numeric constant only.</p> <p>Check program and correct error.</p>
NAT0067	Fehler bei Angabe von Kontrollvariable in FOR-Statement.

Natural Fehlermeldungen 3.1.1

	<p>Error in control value specification of FOR statement.</p> <p>The control value must be numeric and may be specified as a constant, user-defined variable or database field.</p> <p>The TO value may be specified as a numeric constant, user-defined variable, or database field.</p> <p>Any database field used must be available via an active processing loop.</p> <p>Check program and correct error.</p>
NAT0068	<p>Parameter-Fehler im Systemkommando GLOBALS.</p> <p>Parameter error in GLOBALS command.</p> <p>Parameters in the GLOBALS command must be specified with a param identification and a valid argument for the parameter.</p> <p>See the NATURAL Reference Manual, under NATURAL System Commands NATURAL Session Parameters, for further information.</p> <p>Check program and correct error.</p>
NAT0069	<p>Fehler in der COUPLED-Klausel des FIND-Statements.</p> <p>Error in search criteria involving COUPLED clause.</p> <p>The COUPLED clause of a FIND statement may be used to specify a search which involves the ADABAS coupling facility.</p> <p>A maximum of four COUPLED clauses may be used.</p> <p>See the NATURAL Reference Manual, FIND Statement, for further information.</p> <p>Check program and correct error.</p>
NAT0070	<p>GIVE SYSTEM FUNCTIONS pro Report nur einmal erlaubt.</p>

Natural Fehlermeldungen 3.1.1

	<p>GIVE SYSTEM FUNCTIONS allowed only once per report.</p> <p>The GIVE SYSTEM FUNCTIONS clause, which is used to cause the evaluation of NATURAL system functions for subsequent use in an AT END OF PAGE condition, may only be used once for a given report.</p> <p>See the NATURAL Reference Manual, DISPLAY Statement, for further information.</p> <p>Check program and correct error.</p>
NAT0071	<p>Ungültiger Subroutine-Name in DEFINE SUBROUTINE-Statement.</p> <p>Invalid subroutine name in DEFINE SUBROUTINE statement.</p> <p>The name of a subroutine must conform to the same rules that apply for user-defined variables.</p> <p>See the NATURAL Reference Manual, User-Defined Variables, for further information.</p> <p>Check program and correct error.</p>
NAT0072	<p>Eine Subroutine mit diesem Namen wurde bereits definiert.</p> <p>A subroutine with the same name already exists.</p> <p>You have used one subroutine name for two subroutines. However, subroutine names within a program must be unique.</p> <p>Or, you have tried to pass a parameter to an internal subroutine. You can only pass parameters to external subroutines.</p> <p>Check names of defined subroutines. Check parameter passing.</p>
NAT0073	<p>Sortierfelder müssen vorher definiert worden sein.</p>

Natural Fehlermeldungen 3.1.1

	<p>Sort field error; field not previously been defined.</p> <p>The fields used as sort criteria in a SORT statement must be user-defined variables which have been previously defined, or database fields which are available within an active processing.</p> <p>The same field may not be referenced twice in the SORT key field the USING clause.</p> <p>See NATURAL Reference Manual, SORT Statement, for further information.</p> <p>Check program and correct error.</p>
NAT0074	<p>Ungültiger Name in PERFORM SUBROUTINE-Statement.</p> <p>Incorrect specification of name in PERFORM SUBROUTINE.</p> <p>The name of the subroutine must not be enclosed in apostrophes.</p> <p>Check program and correct error.</p>
NAT0075	<p>RETURN oder END-SUBROUTINE fehlt oder falsch plaziert.</p> <p>RETURN or END-SUBROUTINE either missing or misplaced.</p> <p>This error occurs under one of the following conditions:</p> <p>1) A RETURN or END-SUBROUTINE was found even if there is no corresponding DEFINE SUBROUTINE.</p> <p>2) A subroutine was started in a conditional statement block (e.g. IF, DECIDE..), but it was not yet closed at the end of the statement block (e.g. END-IF,...)</p> <p>Example:</p> <p>IF field = 'A' then</p> <p> DEFINE SUBROUTINE ABC</p> <p> WRITE 'HELLO'</p> <p> END-IF</p> <p>3) A subroutine is empty, that is not even one statement has been found in between.</p> <p>Check program and correct error.</p>
NAT0076	Zugewiesene Arbeitsdatei nicht verfügbar oder undefiniert.

Natural Fehlermeldungen 3.1.1

	<p>The assigned work file is not available or not defined.</p> <p>In a batch environment, work files must be defined by providing JCL statements which identify the referenced work file.</p> <p>In an online environment that supports work files, work files must be defined via the setup parameters when starting the NATURAL session.</p> <p>Check program to determine if work file specified correctly. If so, contact your NATURAL administrator for further information on work file assignment/availability.</p>
NAT0077	Fehler im Datenfeld des READ/WRITE WORK FILE-Statements.
	<p>Error in data field for READ/WRITE WORK FILE statement.</p> <p>Data fields may be specified as database fields or as user-defined variables.</p> <p>If the RECORD option is used, the variables must not have been previously defined.</p> <p>If the SELECT option is used, the variables may have been previously defined.</p> <p>Numeric constants may also be used with WRITE WORK FILE.</p> <p>Check program and correct error.</p>
NAT0078	Fehler in 'FILLER nX'-Angabe in READ WORK FILE-Statement.
	<p>Error in 'FILLER nX' specification for READ WORK FILE.</p> <p>A filler may be specified in the definition of the data layout by using the notation 'FILLER nX', where n is an integer number.</p> <p>Check program and correct error.</p>
NAT0079	AT END OF FILE-Klausel ist nur mit ONCE-Option erlaubt.

Natural Fehlermeldungen 3.1.1

	<p>Invalid specification of AT END OF FILE clause.</p> <p>The specification of the AT END OF FILE clause in a READ WORK FILE statement is only permitted if the ONCE option has also been specified. If the ONCE option is not specified, a normal processing loop is created with the end-of-file condition being handled as normal loop termination.</p> <p>Check program and correct error.</p>
NAT0080	<p>Kommando/Programmname muß mit einem Buchstaben beginnen.</p> <p>Command / program name must start with a letter.</p> <p>The command - or the name of the program to be executed - you entered began with an invalid character. The first character of a system or program name must be an alphabetical character, not a number or special character.</p> <p>Enter a valid command or program name.</p>
NAT0081	<p>Objektname im Systemkommando READ fehlt.</p> <p>Program name missing in READ command.</p> <p>The READ command reads a source object from the active NATURAL I (or optionally from the library specified with the command) into the editor work area appropriate for the object type.</p> <p>The correct syntax of the command is:</p> <p>READ object-name</p> <p>library-id must not be specified if NATURAL SECURITY is active.</p> <p>library-id must not begin with 'SYS' (except SYSTEM).</p> <p>Enter READ command with a valid object name.</p>
NAT0082	<p>Ungültiges Kommando; oder :1: :2: nicht in der Library.</p>

Natural Fehlermeldungen 3.1.1

	<p>Invalid command, or :1: :2: does not exist in library.</p> <p>One of the following has occurred:</p> <ul style="list-style-type: none">- You entered a value in the command line which is neither a NATURAL command nor the name of a NATURAL program contained in the active library or in a library defined as a steplib.- An object which is required during execution of a program, subprogram, subroutine or helproutine is not contained in the active library or in a library defined as a steplib.- Your NATURAL session is currently applying system files other than those containing the object you specified. <p>Check to ensure that you entered a valid NATURAL command or the of an existing NATURAL object. Use the command SYSPROF to check whether you are using the correct system file.</p>
NAT0083	Bei SAVE/CATALOG muß das Objekt im Arbeitsspeicher sein.
	<p>SAVE/CATALOG command issued when work area empty.</p> <p>An object can only be SAVED/CATALOGed from the editor work area. An object can be brought into the work area with a READ or EDIT (The command 'RUN program-name' will also read the source of the called 'program-name' into the editor work area, before compilin executing it.)</p> <p>Use READ or EDIT prior to using SAVE/CATALOG.</p>
NAT0084	Programmname bereits vorhanden; SAVE/CATALOG ignoriert.
	<p>Program name already exists; SAVE/CATALOG not executed.</p> <p>NATURAL requires that object names be unique. An object cannot b SAVED or CATALOGed under a name which has already been given to another object.</p> <p>Either choose a different name for the object to be SAVED/CATALO or RENAME/PURGE/UNCATALOG/SCRATCH the existing object of that na before issuing the SAVE/CATALOG command.</p>

Natural Fehlermeldungen 3.1.1

NAT0085	<p>Ungültiger Programmname im SAVE/CATALOG-Kommando.</p> <p>Invalid program name specified in SAVE/CATALOG command.</p> <p>A program name must begin with an alphabetical character and must not be longer than 8 characters.</p> <p>Enter a valid program name.</p>
NAT0086	<p>READ WORK FILE ONCE in AT END OF FILE nicht erlaubt.</p> <p>READ WORK FILE ONCE not allowed in AT END OF FILE.</p> <p>A READ WORK FILE ONCE statement is not permitted within an AT END OF FILE clause.</p> <p>See the NATURAL Reference Manual, READ WORK FILE Statement, for more information.</p> <p>Correct error.</p>
NAT0087	<p>Ungültige Parameter bei USING in DEFINE DATA-Statement.</p> <p>Invalid parameters for USING in DEFINE DATA statement.</p> <p>The USING clause of the DEFINE DATA statement contains invalid parameters.</p> <p>Correct error.</p>
NAT0088	<p>'RUN' eingegeben, aber kein Programm im Arbeitsbereich.</p> <p>RUN command issued without program in work area.</p> <p>If there is a program in the editor work area, you can issue the command without program name so as to compile and execute that program. If the editor work area is empty, you must specify a program name with the RUN command, so as to read a program into the work area, from where it is compiled and executed.</p> <p>Specify a program name with the RUN command, or read the source into the work area with a READ or EDIT command before issuing RU</p>
NAT0089	<p>'CHECK' eingegeben, aber kein Programm im Arbeitsspeicher.</p>

Natural Fehlermeldungen 3.1.1

	<p>CHECK command issued, but no program in work area.</p> <p>The CHECK command can only be used after a source program has been read into the source work area with an EDIT, READ, or RUN command.</p> <p>Use EDIT or READ to place program in source work area before issuing a CHECK command.</p>
NAT0090	<p>Sub-/Superdeskriptor ist in THRU-Klausel nicht erlaubt.</p> <p>Sub-/superdescriptor cannot be used in THRU clause.</p> <p>A subdescriptor or superdescriptor must not be used in a THRU clause. The REDEFINE statement may be used to create a variable which may be used in the THRU clause.</p> <p>A HISTOGRAM statement may be used to read the values of the sub- or superdescriptor in sequence, followed by a FIND statement using the value read to retrieve the records.</p> <p>Check program and correct error.</p>
NAT0091	<p>Nur 'UPDATE ON' und 'UPDATE OFF' sind erlaubt.</p> <p>Only 'ON' or 'OFF' allowed with UPDATE command.</p> <p>The UPDATE command may be used to disable or enable database updating.</p> <ul style="list-style-type: none">- 'UPDATE ON' enables updating of the database.- 'UPDATE OFF' disables updating of the database. <p>Other command options are not allowed with the UPDATE command.</p> <p>Enter the command 'UPDATE ON' or 'UPDATE OFF'.</p>
NAT0092	Falscher/fehlender Blockname in DEFINE DATA-Statement.

Natural Fehlermeldungen 3.1.1

	<p>Invalid/missing block name in DEFINE DATA statement.</p> <p>One of the following errors was detected while processing the block name of a data block contained within a global data area:</p> <ul style="list-style-type: none">- An error in block naming conventions was detected.- The data block specified was not found in the current global data area. <p>Check program and correct error.</p>
NAT0093	<p>Operand nach 'MARK' in REINPUT muß ganzzahlig sein.</p> <p>Field identification for REINPUT must be an integer.</p> <p>The operand after the keyword 'MARK' in a REINPUT statement must be a positive integer constant or a numeric variable containing an integer.</p> <p>Check program and correct error.</p>
NAT0094	<p>Falsche Initialwert-Definition in DEFINE DATA-Statement.</p> <p>Invalid initial value definition in DEFINE DATA statement.</p> <p>The definition of initial values in the DEFINE DATA statement is invalid. Note in particular that the NATURAL session parameter DTFORM must correspond to the value definition in the DEFINE DATA statement.</p> <p>For example: DTFORM=U and a D'YYYY-MM-DD' constant would cause an error.</p> <p>Moreover, a numeric initial value must not have more precision or scale digits than defined in the variable.</p> <p>For example: 1 #FLD1 (N2.2) INIT causes an error. 1 #FLD2 (N2.2) INIT causes an error.</p> <p>Correct error.</p>
NAT0095	<p>INPUT- bzw. REINPUT-Text muß alphanumerisch sein.</p>

Natural Fehlermeldungen 3.1.1

	<p>Only alpha constant/field allowed for text in (RE)INPUT.</p> <p>The 'text' in an INPUT or REINPUT statement can be specified with alphanumeric constant, a previously defined alphanumeric variable or an alphanumeric database field.</p> <p>Check that the variable used is defined as alphanumeric format or that the text constant is enclosed in apostrophes.</p>
NAT0096	'USING gda-name' muß auf DEFINE DATA GLOBAL folgen.
	<p>Invalid use of GLOBAL in DEFINE DATA statement.</p> <p>'USING gda-name' is required after the keyword 'GLOBAL' when referencing a global data area in a DEFINE DATA statement.</p> <p>Correct error.</p>
NAT0097	Fehlerhafte Variablendefinition in REDEFINE-Statement.
	<p>Invalid variable definition in REDEFINE statement.</p> <p>The variable definition is invalid for one or both of the following reasons:</p> <ul style="list-style-type: none">- invalid format specification;- invalid field length specification. <p>Correct error.</p>
NAT0098	Mindestens einen Feldnamen in RESET-Statement angeben.
	<p>At least one field required for RESET statement.</p> <p>The RESET statement requires that at least one variable be specified after the keyword RESET (or after the keyword INITIAL, if this is used).</p> <p>Correct error.</p>
NAT0099	Mindestens einen Feldnamen in COMPRESS-Statement angeben.

Natural Fehlermeldungen 3.1.1

	<p>Field error in a COMPRESS statement.</p> <p>The COMPRESS statement compresses multiple field/literal values into another field. At least one value to be compressed must be specified. The value specified must be either a literal constant or an alphanumeric field.</p> <p>Correct error.</p>
NAT0100	Felder mit Format C oder L in COMPRESS/MOVE ALL verboten.
	<p>Format 'C' or 'L' not allowed with COMPRESS or MOVE ALL.</p> <ul style="list-style-type: none">- Multiple values may be compressed into one receiving field by use of a COMPRESS statement. The field whose values are compressed must not be of format 'C' or 'L'.- One value may be moved more than once to a receiving field with a MOVE ALL statement. The value to be moved must be of alphanumeric (A) or unpacked numeric (N) format. <p>Correct error.</p>
NAT0101	Zieldorf in COMPRESS/MOVE ALL muß alphanumerisch sein.
	<p>Only format 'A' allowed for result field.</p> <ul style="list-style-type: none">- The result field in a COMPRESS or MOVE ALL statement must be of alphanumeric (A) format.- A variable for which an INIT value with 'FULL LENGTH' or 'LENGTH' option is defined, must be of alphanumeric (A) format. <p>Correct error.</p>
NAT0102	Verwendung unerlaubter Systemfunktion nach SORT-Statement.

Natural Fehlermeldungen 3.1.1

	<p>Error in reference to NATURAL system function in SORT.</p> <p>Only the system functions MAX, MIN, AVER, TOTAL may be evaluated</p> <p>The values of these functions may be referenced after the sort operation in the form *FUNCTION(VARIABLE).</p> <p>Example:</p> <pre>MOVE *TOTAL(SALARY) TO PAYROLL-TOTAL(N8)</pre> <p>Correct error.</p>
NAT0103	<p>Fehlerhaftes Empfangsfeld in COMPRESS-Statement.</p> <p>Error in receiving field for COMPRESS statement.</p> <p>In a COMPRESS statement, the word 'INTO' (or 'TO') must be followed by a valid field name so as to indicate where the result is to be placed.</p> <p>The receiving field must be of alphanumeric (A) format.</p> <p>Correct error.</p>
NAT0104	<p>Mehr als ein schleifenauslosendes Statement pro Zeile.</p> <p>Multiple loop-initiating statements in the same line.</p> <p>Only one loop-initiating statement may be specified in a single source code line.</p> <p>Enter each loop-initiating statement in a separate line.</p>
NAT0105	<p>Ihr DBA hat das Ändern dieser Datenbank nicht erlaubt.</p> <p>Database updating not permitted.</p> <p>The NATURAL administrator has disabled updating of the specified database.</p> <p>No programs with database-update functions can be created.</p> <p>Contact your NATURAL administrator.</p>
NAT0106	<p>SAVE,CATALOG,STOW,PURGE,UNCATALOG,SCRATCH nicht erlaubt.</p>

Natural Fehlermeldungen 3.1.1

	<p>SAVE/CATALOG/STOW/PURGE/UNCATALOG/SCRATCH not available.</p> <p>Your NATURAL administrator has set the profile parameters ROSY and/or RECAT so that the system commands SAVE, CATALOG, STOW, PU UNCATALOG, SCRATCH cannot be used.</p> <p>Contact your NATURAL administrator.</p>
NAT0107	<p>Maximal 2000 Bytes an END TRANSACTION-Daten möglich.</p> <p>No more than 2000 bytes may be specified for ET data.</p> <p>An END TRANSACTION statement was issued in which more than the maximum of 2000 bytes of user data were provided.</p> <p>Reduce the amount of ET data.</p>
NAT0108	<p>Fehler bei Gruppenreferenzierung in WRITE WORK FILE.</p> <p>Error in group reference in WRITE WORK FILE statement.</p> <p>An error was detected during the processing of individual fields that are referenced via a group name.</p> <p>Check group definition.</p>
NAT0109	<p>Unzulässige Referenzierung in GET SAME-/UPDATE-Statement.</p> <p>Invalid reference in GET SAME or UPDATE statement.</p> <p>The GET SAME or UPDATE statement can only refer back to a database-access statement, such as FIND, READ or GET, which is active; that is, the processing loop for that database access must still be open.</p> <p>Correct error.</p>
NAT0110	Auf das END-Statement darf kein Sourcecode mehr folgen.

Natural Fehlermeldungen 3.1.1

	<p>No source text allowed after the END statement.</p> <p>The END statement indicates the end of the source of a NATURAL o No other statements or comment lines are allowed after the END statement.</p> <p>A probable cause of this error is the misspelling of a name or t omission of 'PAGE', 'DATA', 'TRANSACTION' from the statements AT END OF PAGE, AT END OF DATA, END TRANSACTION respectively; or a missing hyphen in END-DEFINE, END-FIND, END-IF etc.</p> <p>Correct error.</p>
NAT0111	<p>Funktion nur mit :1: verfügbar.</p> <p>Function only available with</p> <p>You have specified a function which is currently not available, because the Software AG product which provides this function is not installed in your current NATURAL environment.</p> <p>For example, the use of the system command MAIL would lead to th error if NATURAL SECURITY is not installed.</p> <p>Contact your NATURAL administrator.</p>
NAT0112	<p>Ungültige Verwendung eines Gruppennamens.</p> <p>Invalid use of group name.</p> <p>A group name must not be specified in this statement; specify elementary fields instead.</p> <p>Correct error in program.</p>
NAT0113	<p>DOEND-Statement ohne vorhergehendes DO-Statement.</p> <p>DOEND statement found without preceding DO statement.</p> <p>A DOEND statement may only be used to terminate a group of statements which are preceded by a DO statement. Each DOEND is paired with the last previous unpaired DO.</p> <p>Check usage of DO/DOEND and correct error.</p>

Natural Fehlermeldungen 3.1.1

NAT0114	<p>Fehler in SET KEY-Statement oder KEY-Kommando.</p> <p>Error in SET KEY statement construction.</p> <p>See NATURAL Reference Manual for information on valid syntax for SET KEY statement.</p> <p>Correct error in program.</p>
NAT0115	<p>Fehler in Variablendefinition für GET TRANSACTION DATA.</p> <p>Error in variable definition for GET TRANSACTION DATA.</p> <p>This error is usually the result of a misspelt variable name.</p> <p>In the GET TRANSACTION DATA statement, all types of variables of all formats are allowed.</p> <p>Variables may either be newly defined in the GET TRANSACTION DATA statement or may be referenced from a previous definition.</p> <p>Check program and correct error.</p>
NAT0116	<p>Falsche Angabe von Notation '/n/' in AT BREAK-Statement.</p> <p>Incorrect '/n/' specification in AT BREAK statement.</p> <p>The '/n/' notation in an AT BREAK statement was specified incorrectly. 'n' must be specified as a numeric constant.</p> <p>Example: AT BREAK OF POST-CODE/5/</p> <p>Correct error.</p>
NAT0117	<p>Das Wort 'IDENTICAL' fehlt in SUSPEND IDENTICAL SUPPRESS.</p> <p>Word 'IDENTICAL' missing in SUSPEND IDENTICAL SUPPRESS.</p> <p>The word 'IDENTICAL' specifies the action to be taken for the suppress operation and is therefore required.</p> <p>Correct error.</p>
NAT0118	<p>Funktionstaste nicht mit Wert des Formats A, N, B belegt.</p>

Natural Fehlermeldungen 3.1.1

	<p>Value assigned to function key not format 'A'.</p> <p>The value to be assigned to a function key must be specified as literal constant, or by a user-defined variable with format 'A'.</p> <p>Correct error.</p>
NAT0119	<p>Unerlaubtes Format für UNTIL-Wert in MOVE ALL-Statement.</p> <p>Invalid format for value in MOVE ALL statement.</p> <p>The format of the value provided with the UNTIL option must be either 'N' or 'P'.</p> <p>Correct error.</p>
NAT0120	<p>Ungültiger Programmname in FETCH-Statement.</p> <p>Invalid program name in FETCH statement.</p> <p>The name of a program to be fetched by the FETCH statement may be specified as an alphanumeric constant or as the content of an alphanumeric user-defined variable.</p> <p>Correct error.</p>
NAT0121	<p>Dieses Statement ist im Structured Mode nicht erlaubt.</p> <p>This statement is not permitted in structured mode.</p> <p>Do not use this statement, or switch to reporting mode.</p>
NAT0122	<p>Felder in IF SELECTION-Statement müssen Format 'A' haben.</p> <p>Only format 'A', 'C' or 'L' allowed for fields in IF SELECTION.</p> <p>The IF SELECTION statement may only be used to check the content of alphanumeric, attribute control and logical fields for non-bl contents. Only operands of the same type can be checked.</p> <p>Correct error.</p>
NAT0123	<p>Fehler in Feldangabe für IF SELECTION-Statement.</p>

Natural Fehlermeldungen 3.1.1

	Error in field specification for IF SELECTION statement. At least one field must be specified in the IF SELECTION statement. Correct error.
NAT0124	Falsche Index-Schreibweise bei MOVE INDEXED-Statement. Error in index notation for MOVE INDEXED statement. The index must be specified as a numeric constant or a user-defined variable defined with format 'N'. Examples: MOVE INDEXED #A TO #B MOVE INDEXED #A TO #B Correct error.
NAT0125	Ausgabeelement nach DISPLAY/WRITE/INPUT fehlt. No or invalid output element following DISPLAY/WRITE/INPUT. At least one element must be specified in a DISPLAY, WRITE or IN statement. A possible cause for the error is a misspelt variable name that conflicts with the name of a NATURAL statement. Check program and correct error.
NAT0126	Fehler beim Qualifizieren einer Variablen. Error in qualification of variable. Only one level of qualification is allowed. Check program and correct error.
NAT0127	Das Wort 'AS' fehlt in RETAIN AS-Klausel des FIND.

Natural Fehlermeldungen 3.1.1

	<p>The word 'AS' is missing in FIND AND RETAIN AS.</p> <p>The word 'AS' identifies that a RETAIN SET operation is to be performed and it must therefore be specified.</p> <p>Add the word 'AS' to the RETAIN clause of the FIND statement.</p>
NAT0128	<p>Der Wert, der den Set identifiziert, muß Format 'A' haben.</p> <p>Value to be used to identify set must be of format 'A'.</p> <p>The value used in a RETAIN clause to identify a set of records must be specified either as an alphanumeric constant or the content of an alphanumeric variable.</p> <p>This error may also occur if the WITH clause of a FIND statement contains a non-descriptor.</p> <p>Check program and correct error.</p>
NAT0129	<p>Der angegebene Set-Name ist länger als 32 Zeichen.</p> <p>The specified set name is longer than 32 characters.</p> <p>The name for a set in a RETAIN AS clause may be specified as an alphanumeric constant or the content of an alphanumeric variable.</p> <p>The set name must not be longer than 32 characters.</p> <p>Check program and correct error.</p>
NAT0130	<p>Kein '/' direkt vor Schlüsselwort VERT bzw. HORIZ erlaubt.</p> <p>No '/' allowed immediately before keywords HORIZ or VERT.</p> <p>The keywords HORIZ(ONTALLY) and VERT(ICALLY) indicate the initiation of a new output column. As a new column cannot be placed underneath an already processed column, the character '/' - which indicates that the next element is to be placed under the previous one - cannot be used before the keywords HORIZ, VERT, HORIZONTALLY, VERTICALLY.</p> <p>Check program and correct error.</p>
NAT0131	GET TRANSACTION DATA muß mindestens 1 Variable haben.

Natural Fehlermeldungen 3.1.1

	<p>GET TRANSACTION DATA needs at least one variable.</p> <p>The GET TRANSACTION DATA statement must contain at least one variable in which the transaction data can be placed.</p> <p>This error may be caused by a misspelt variable name or by an invalid character in a variable name.</p> <p>Check program and correct error.</p>
NAT0132	<p>Operand ist nicht definiert oder nicht alphanumerisch.</p> <p>Operand not defined or not of alphanumeric format.</p> <p>The variable that is examined in an EXAMINE statement must have been defined before and it must be of alphanumeric format.</p> <p>Check program and correct error.</p>
NAT0133	<p>Fehler bei EXAMINE/REPLACE-Wert in EXAMINE-Statement.</p> <p>EXAMINE or REPLACE value error in EXAMINE statement.</p> <p>The EXAMINE value and the REPLACE value must be of alphanumeric format.</p> <p>If a variable is used for the value, it must also be of alphanumeric format.</p> <p>An index range is not permitted.</p> <p>Check program and correct error.</p>
NAT0134	<p>Fehler in der NUMBER-Option des EXAMINE-Statements.</p> <p>Error in NUMBER option of EXAMINE statement.</p> <p>The error may be caused by misspelling a variable name.</p> <p>The NUMBER variable must be of a numeric format ('N', 'P' or 'I')</p> <p>The NUMBER variable must be an integer.</p> <p>See the NATURAL Reference Manual, EXAMINE statement, for further information.</p> <p>Check program and correct error.</p>

Natural Fehlermeldungen 3.1.1

NAT0135	<p>In EXAMINE-Statement fehlt DELETE/REPLACE/GIVING-Klausel.</p> <p>DELETE/REPLACE/GIVING clause missing in EXAMINE statement.</p> <p>The EXAMINE statement requires at least one of the following clauses:</p> <p>REPLACE DELETE GIVING NUMBER GIVING POSITION GIVING LENGTH GIVING INDEX</p> <p>See NATURAL Reference Manual, EXAMINE statement, for more information.</p> <p>Check program and correct error.</p>
NAT0136	<p>Fehler in EXAMINE TRANSLATE-Statement.</p> <p>Error in EXAMINE TRANSLATE statement.</p> <p>In an EXAMINE TRANSLATE statement, the keyword 'TRANSLATE' must be followed by 'INTO UPPER', 'INTO LOWER', or a USING clause.</p> <p>See NATURAL Reference Manual for further information on EXAMINE TRANSLATE statement.</p> <p>Correct error in program.</p>
NAT0137	<p>Im RELEASE-Statement wurde kein Objekt angegeben.</p> <p>No object specified in RELEASE statement.</p> <p>Possible objects to be released are:</p> <p>STACK - release all data items from the stack. PARAMETERS - release all parameters built during the session. SETS - release all FIND sets. SET set name - release one specific FIND set.</p> <p>Check program and correct error.</p>
NAT0138	<p>Bezeichner für FIND-Set: Format A und maximal 32 Stellen.</p>

Natural Fehlermeldungen 3.1.1

	<p>Identifier for FIND set must be alpha and The identifier may be specified as an alphanumeric constant or t contents of an alphanumeric variable. The contents of the variable will be used to identify the FIND s The alphanumeric value can only be up to 32 bytes long because t is the maximum length of a FIND set identification.</p> <p>Check program and correct error.</p>
NAT0139	STACK-Statement muß mindestens 1 Datenelement beinhalten. At least 1 data item must be specified in STACK statement. Constants or variables of the formats 'A', 'N' or 'B' may be used as data items in a STACK statement. At least one of these items must be present in a STACK statement Check program and correct error.
NAT0140	Auswertung von 'NOT' in FIND nur nach vorherigem 'AND'. 'NOT' is only possible after 'AND' operation. Exclusion of a set can only be done when the set name is precede by the logical operator 'AND' and followed by the operator 'NOT' The set will then be excluded from the number of records that we selected up to that point. Restructure the logical criteria to place the set to be excluded after an AND operation.
NAT0141	Ungültiges Schlüsselwort in SET GLOBALS-Statement. Invalid keyword specified in SET GLOBALS statement. The valid keywords for the SET GLOBALS statement are described in the NATURAL Reference Manual. Check program and correct error.
NAT0142	Ungültiger Wert für Parameter in SET GLOBALS-Statement.

Natural Fehlermeldungen 3.1.1

	<p>Invalid value for keyword in SET GLOBALS statement.</p> <p>The value for a SET GLOBALS keyword can be supplied as a constant or as a variable. If a constant is supplied, it must be alphanumeric and have a correct value; for example: PS must be numeric and in the range from 0 to 250. If a variable is supplied, it must also be of the correct type. If it is numeric, it must be an integer.</p> <p>See the NATURAL Reference Manual, SET GLOBALS statement, for more information.</p> <p>Check program and correct error.</p>
NAT0143	Wert für diesen SET GLOBALS-Parameter muß Format A haben.
	<p>Invalid format for value in SET GLOBALS statement.</p> <p>The SET GLOBALS keyword in question requires an alphanumeric value. The alphanumeric value can be specified as a constant or as the content of an alphanumeric variable (format A).</p> <p>Check program and correct error.</p>
NAT0144	Die Parameter SL + MD sind mit SET GLOBALS nicht möglich.
	<p>Invalid keyword in SET GLOBALS statement.</p> <p>The parameters SL and MD are not allowed in a SET GLOBALS statement. They may, however, be set with the system command GLOBALS.</p> <p>Check program and correct error.</p>
NAT0145	Ungültiges Format für Parameterwert in SET GLOBALS.

Natural Fehlermeldungen 3.1.1

	<p>Invalid format for value in SET GLOBALS statement.</p> <p>See the NATURAL Reference Manual, Session Parameters, to determine valid possible values for the SET GLOBALS keywords.</p> <p>Valid formats are integer numeric for keywords whose values are and alphanumeric for keywords whose possible values are 'ON/OFF' alphanumeric characters.</p> <p>The values 'T/F' may be used as synonyms for 'ON/OFF' respectively.</p> <p>For example: SET GLOBALS EJ=OFF has the same meaning as SET GLOBALS EJ=F</p> <p>Check program and correct error.</p>
NAT0146	Unzulässige Syntax in SET GLOBALS-Statement.
	<p>Invalid syntax in SET GLOBALS statement.</p> <p>The syntax of the SET GLOBALS statement requires that each parameter be followed by the assignment character '=', which in turn is to be followed by the value for the parameter.</p> <p>Check program and correct error.</p>
NAT0147	Angabe eines Kommandos für STACK COMMAND-Statement fehlt.
	<p>No command supplied in STACK statement.</p> <p>The COMMAND option of the STACK statement was specified, but no command was provided.</p> <p>Check program and correct error.</p>
NAT0148	Variable in TERMINATE-Statement muß Format N, I, P haben.
	<p>Invalid format for variable in TERMINATE statement.</p> <p>Only variables of format 'N', 'I' or 'P' are permitted with the TERMINATE statement.</p> <p>The value must lie between 0 and 255.</p> <p>Check program and correct error.</p>
NAT0149	Formatfehler in MOVE EDITED-Statement

Natural Fehlermeldungen 3.1.1

	<p>Format error in MOVE EDITED statement.</p> <p>A field used in a MOVE EDITED statement for which an edit mask has not been defined, must be defined with alphanumeric (A) form</p> <p>Check program and correct error.</p>
NAT0150	<p>Editiermaske für Ausgangs-/Zielfeld in MOVE EDITED fehlt.</p> <p>Edit mask missing in MOVE EDITED statement.</p> <p>A MOVE EDITED statement requires the specification of an edit mask for the sending field or the receiving field.</p> <p>Check program and correct error.</p>
NAT0151	<p>Ungültiger Map-Name in INPUT-Statement.</p> <p>Invalid map name in INPUT statement.</p> <p>The name of a map to be used in an INPUT statement can be specified as a literal constant or the content of an alphanumeric variable. If a variable is used, it must have been previously defined.</p> <p>Check program and correct error.</p>
NAT0152	<p>Map-Name in INPUT-Statement muß alphanumeric sein.</p> <p>Invalid map format in INPUT statement.</p> <p>The name of a map to be used in an INPUT statement may be specified as a literal alphanumeric constant or the content of an alphanumeric variable. If a variable is used, it must have been previously defined.</p> <p>Check program and correct error.</p>
NAT0153	<p>Format-Definition ist für Gruppennamen nicht erlaubt.</p>

Natural Fehlermeldungen 3.1.1

	<p>Format definition not allowed for a group name.</p> <p>A group name is used to refer to a collection of fields as a single structure. Since this structure is defined by the formats of the fields, the group name need not have a format definition. If a field of one format is to be redefined as fields of different formats, the REDEFINE statement should be used.</p> <p>Another possible cause of this error is that the level number of next variable definition is higher than that of the variable name although both variables should probably be at the same level.</p> <p>Remove the format definition at the group name level, or make sure that the level numbers are correct.</p>
NAT0154	Anzahl der Felder in Variablenliste + Map muß gleich sein.
	<p>Number of variables must match number of map fields.</p> <p>If an INPUT USING MAP statement refers to a predefined map, the number of fields defined in the map must match the number of fields defined in the INPUT statement.</p> <p>Check program and correct error.</p>
NAT0155	Ein Map-Name darf maximal 7 Zeichen lang sein.
	<p>Map name must not be longer than 7 characters.</p> <p>A map name can be specified as a literal constant or the content of an alphanumeric variable. The maximum length of a map name is 7 characters.</p> <p>Check program and correct error.</p>
NAT0156	INPUT-Variablen entsprechen in Format/Länge nicht der Map.
	<p>Variable format incompatible with specified map.</p> <p>Variables used in an INPUT USING MAP statement must correspond in format and length with the corresponding elements of the map definition.</p> <p>Check program and correct error.</p>
NAT0157	Länge von INPUT-Variablen entspricht nicht denen der Map.

Natural Fehlermeldungen 3.1.1

	<p>Variable length incompatible with specified map.</p> <p>Variables used in an INPUT USING MAP statement must correspond in format and length with the corresponding elements of the map def</p> <p>Check program and correct error.</p>
NAT0158	<p>Unerlaubte Angabe einer Gruppe in MOVE BY NAME-Statement.</p> <p>Invalid group specification in MOVE BY NAME statement.</p> <p>The operands to be specified in a MOVE BY NAME statement must be valid and existing group names. They may also be user views. Individual field names cannot be specified.</p> <p>If a user view is used, it must not be qualified with a statement label or source-code line number.</p> <p>Check program and correct error.</p>
NAT0159	<p>Keine übereinstimmenden Gruppennamen in MOVE BY NAME.</p> <p>No matching names in MOVE BY NAME statement.</p> <p>At least one field with the same name must exist in both groups.</p> <p>Check program and correct error.</p>
NAT0160	<p>Ungültiger Deskriptor in READ LOGICAL-Statement.</p> <p>Invalid descriptor in READ LOGICAL statement.</p> <p>Descriptors that are multiple-valued are not permitted in the THRU or ENDING AT clause of a READ statement.</p> <p>Phonetic descriptors must not be used in a READ statement.</p> <p>A field contained in a PE-group may not be used as search-field in a READ statement.</p> <p>Check program and correct error.</p>
NAT0161	ROUNDED-Klausel ist bei DIVIDE REMAINDER nicht erlaubt.

Natural Fehlermeldungen 3.1.1

	<p>ROUNDED clause not allowed with DIVIDE REMAINDER.</p> <p>In a DIVIDE statement, you can use either the ROUNDED option to the result of the division rounded, or the REMAINDER option to have the remainder of the division placed into a separate field. As there can be no remainder with a rounded result, it obviously makes no sense to use both options at the same time and is therefore not permitted.</p> <p>Use ROUNDED option or REMAINDER option, but not both.</p>
NAT0162	Für DIVIDE REMAINDER ist Format 'F' nicht erlaubt.
	<p>Floating format not allowed for DIVIDE REMAINDER.</p> <p>When you use the REMAINDER option in a DIVIDE statement, the formats of the divisor and the dividend must not be 'F' (floating point).</p> <p>Check program and correct error.</p>
NAT0163	Angabe eines Levels fehlt in DEFINE DATA-Statement.
	<p>Specification of level missing in DEFINE DATA statement.</p> <p>In a DEFINE DATA statement, there must be an integer level number before each variable, group, view, REDEFINE definition.</p> <p>Check program and correct error.</p>
NAT0164	Der Name nach der Level-Nummer widerspricht den Regeln.
	<p>Illegal syntax for name after level number.</p> <p>In a DEFINE DATA statement, the level specification must be followed by a valid name of a variable, group or view.</p> <p>See NATURAL Reference Manual, General Information (Naming Conventions) and DEFINE DATA statement, for rules on naming variables.</p> <p>Correct error in program.</p>
NAT0165	Inkonsistenz in Datenstruktur des DEFINE DATA-Statements.

Natural Fehlermeldungen 3.1.1

	<p>Inconsistency in data structure of DEFINE DATA statement.</p> <p>An inconsistency in the data structure of a DEFINE DATA statement has been detected.</p> <p>Check specification of levels and variable definitions.</p>
NAT0166	<p>Ungültige Variablendefinition in DEFINE DATA-Statement.</p> <p>Invalid variable definition in DEFINE DATA statement.</p> <p>An invalid definition of the DEFINE DATA statement has been detected.</p> <p>Check and correct variable definition.</p>
NAT0167	<p>Ein View-Name wurde mehrfach angegeben.</p> <p>Duplicate specification of a view name detected.</p> <p>View names in the data structure of a program must be unique.</p> <p>Check view names of each GLOBAL, PARAMETER and LOCAL data structure.</p>
NAT0168	<p>Bei DIVIDE ohne GIVING muß INTO-Feld eine Variable sein.</p> <p>INTO constant not allowed in DIVIDE without GIVING clause.</p> <p>If your DIVIDE statement does not have a GIVING clause, the result will be placed into the operand after keyword 'INTO'; in this case the INTO operand cannot be a constant.</p> <p>If you require the INTO operand to be a constant, use a GIVING clause to specify a result field.</p> <p>Check program and correct error.</p>
NAT0169	Fehler bei Angabe von EM, HD, PM in DEFINE DATA-Statement.

Natural Fehlermeldungen 3.1.1

	<p>Error in EM, HD, PM definition or in length/format.</p> <p>An invalid specification of one of the following parameters in the DEFINE DATA statement was detected:</p> <ul style="list-style-type: none">EM (edit mask),HD (header),PM (presentation mode). <p>Or the format/length of a field is invalid.</p> <p>See the NATURAL Reference Manual, DEFINE DATA statement for details.</p> <p>Check program and correct error.</p>
NAT0170	<p>INTO-Feld in SEPARATE-Statement muß eine Variable sein.</p> <p>A variable must be specified in INTO clause of SEPARATE.</p> <p>A variable, not a constant, must be specified with the INTO clause of the SEPARATE statement.</p> <p>Check program and correct error.</p>
NAT0171	<p>SEPARATE-, INTO- und DELIMITER-Feld muß Format 'A' haben.</p> <p>SEPARATE, INTO and DELIMITER fields must be alphanumeric.</p> <p>Only alphanumeric fields can be used in a SEPARATE statement (except for the NUMBER option).</p> <p>Check program and correct error.</p>
NAT0172	<p>Im SEPARATE-Statement fehlt die INTO-Klausel.</p> <p>The INTO clause is missing in a SEPARATE statement.</p> <p>The keyword 'INTO', followed by one or more operands, is required in a SEPARATE statement.</p> <p>Check program and correct error.</p>
NAT0173	<p>Das Schlüsselwort 'NUMBER' fehlt in der GIVING-Klausel.</p>

Natural Fehlermeldungen 3.1.1

	<p>The keyword 'NUMBER' is missing in a GIVING clause.</p> <p>If 'GIVING' is used, the keyword 'NUMBER' is also required.</p> <p>Check program and correct error.</p>
NAT0174	<p>Das NUMBER-Feld muß eine Ganzzahl sein (Format N, I, P).</p> <p>The field after NUMBER must be a numeric integer (N,I,P).</p> <p>The field specified in the GIVING NUMBER clause of a SEPARATE statement must be a numeric integer; that is, its format must be one of the following: I</p> <p style="padding-left: 40px;">N (without decimal digits)</p> <p style="padding-left: 40px;">P (without decimal digits)</p> <p>Check program and correct error.</p>
NAT0175	<p>SEPARATE braucht 1 Ausgangs- und mindestens 1 Zielfeld.</p> <p>Source field and at least one target field are required.</p> <p>The source field in a SEPARATE statement may be an alphanumeric or variable.</p> <p>At least one target field, which must be an alphanumeric variable, must be specified.</p> <p>Check program and correct error.</p>
NAT0176	<p>Fehler bei POSITION-Variable in EXAMINE-Statement.</p> <p>Error in POSITION field of EXAMINE statement.</p> <p>The error may be caused by misspelling a variable name used as a reference to the POSITION variable. The variable must be of numeric format (N, I or P), and it must also be an integer (no decimal digits).</p> <p>Check program and correct error.</p>
NAT0177	<p>Fehler bei der LENGTH-Variablen in EXAMINE-Statement.</p>

Natural Fehlermeldungen 3.1.1

	<p>Error in LENGTH field of EXAMINE statement.</p> <p>The error may be caused by misspelling a variable name used as reference to the LENGTH variable. This variable must be of numeric format (N,I,B or P), and it must be an integer (no decimal digit).</p> <p>Check program and correct error.</p>
NAT0178	<p>Fehler bei der INDEX-Variablen in EXAMINE-Statement.</p> <p>Error in INDEX field of EXAMINE statement.</p> <p>The error may be caused by misspelling a variable name used as reference to an INDEX variable. The variables must be of numeric format (N,I,B or P), and they must be integers (no decimal digit).</p> <p>The number of INDEX variables must equal the number of dimension contained in the examined array.</p> <p>Check program and correct error.</p>
NAT0179	<p>Unbekanntes Schlüsselwort in GIVING-Klausel in EXAMINE.</p> <p>Invalid keyword in GIVING clause of EXAMINE statement.</p> <p>The following keywords are valid after GIVING:</p> <p>NUMBER POSITION LENGTH INDEX</p> <p>If more than one keyword is specified, they must be specified in order indicated above.</p> <p>Check program and correct error.</p>
NAT0180	<p>Das Wort 'TEXT' fehlt nach 'WITH' in INPUT-Statement.</p> <p>Word 'TEXT' missing after 'WITH' in INPUT statement.</p> <p>The word 'TEXT' is a required part of the WITH TEXT clause.</p> <p>Check program and correct error.</p>
NAT0181	<p>Fehlerhafte Variablenangabe in einer WITH TEXT-Klausel.</p>

Natural Fehlermeldungen 3.1.1

	Error in specification of a variable in WITH TEXT clause. See NATURAL Reference Manual, INPUT or REINPUT statement, for details. Check program and correct error.
NAT0182	Ungültige Parameterliste in einer WITH TEXT-Klausel. Invalid parameter list for WITH TEXT clause. See NATURAL Reference Manual, INPUT or REINPUT statement, for details. Check program and correct error.
NAT0183	In WITH TEXT-Klausel sind maximal 9 Parameter erlaubt. No more than 9 parameters allowed in WITH TEXT clause. Check program and correct error.
NAT0184	Fehler bei Angabe einer Variablen in der MARK-Klausel. Specification error in variable of MARK clause. The variable must be a numeric integer and must have been previously defined. Check program and correct error.
NAT0185	Nach 'AND' bzw. 'SOUND' muß das Wort 'ALARM' stehen. Keyword 'ALARM' is required after 'AND' or 'SOUND'. The keyword 'ALARM' is a required keyword to identify the ALARM. If the keywords 'AND' and 'SOUND' may be omitted. Check program and correct error.
NAT0186	DO und DOEND sind im Structured Mode nicht erlaubt.

Natural Fehlermeldungen 3.1.1

	<p>Keywords DO or DOEND not permitted in structured mode.</p> <p>You wanted to use a DO/DOEND statement group in structured mode; however, DO/DOEND statement groups are only permitted in reporting mode. In structured mode, explicit END-... statements are used to indicate the end of a statement block; for example:</p> <p style="padding-left: 40px;">AT BREAK DO...DOEND becomes AT BREAK...END-BREAK AT END OF DATA DO...DOEND becomes AT END OF DATA...END AT END OF PAGE DO...DOEND becomes AT END OF PAGE...END AT START OF DATA DO...DOEND becomes AT START OF DATA...E AT TOP OF PAGE DO...DOEND becomes AT TOP OF PAGE...END IF...DO..DOEND ELSE DO...DOEND becomes IF...THEN...ELSE...E ON ERROR DO...DOEND becomes ON ERROR...END-ERROR BEFORE BREAK DO...DOEND becomes BEFORE BREAK...END-B PERFORM BREAK DO...DOEND becomes PERFORM BREAK...END</p> <p>Select reporting mode or use the correct syntax.</p>
NAT0187	Das LOOP-Statement ist im Structured Mode nicht erlaubt.
	<p>The LOOP statement is not permitted in structured mode.</p> <p>You wanted to use the statement LOOP in structured mode; however, the LOOP statement is only permitted in reporting mode. In structured mode, a loop is not closed with a LOOP statement but with an explicit loop-closing END-... statement; for example:</p> <p>Reporting Mode: FIND ... LOOP</p> <p>Structured Mode: FIND ... END-FIND</p> <p>Select reporting mode or use structured mode syntax.</p>
NAT0188	SORT ohne END-ALL ist im Structured Mode nicht erlaubt.
	<p>SORT without END-ALL is not permitted in structured mode.</p> <p>In structured mode, a processing loop initiated with a SORT statement must be closed with an END-ALL statement.</p> <p>Check program and correct error.</p>
NAT0189	END-ALL mit SORT ist nur im Structured Mode erlaubt.

Natural Fehlermeldungen 3.1.1

	<p>END-ALL must be followed by SORT in structured mode.</p> <p>Check program and correct error.</p>
NAT0190	<p>Die UNTIL- oder WHILE-Klausel steht an falscher Stelle.</p> <p>Invalid placement of UNTIL or WHILE clause.</p> <p>An UNTIL or WHILE clause must be specified either immediately after the keyword 'REPEAT'; or immediately before the 'END-REPEAT'.</p> <p>Examples:</p> <ol style="list-style-type: none">1. REPEAT UNTIL logical-condition statements END-REPEAT2. REPEAT statements UNTIL logical-condition END-REPEAT <p>Check program and correct error.</p>
NAT0191	<p>Nach UNTIL/WHILE fehlt das schleifenbeendende Statement.</p> <p>Loop-ending statement missing after UNTIL/WHILE.</p> <p>In structured mode, a REPEAT ... UNTIL/WHILE processing loop must be closed with 'END-REPEAT'. In reporting mode, it must be closed with 'LOOP'.</p> <p>Check program and correct error.</p>
NAT0192	<p>Im ESCAPE-Statement fehlt eine Zielangabe.</p>

Natural Fehlermeldungen 3.1.1

	<p>Destination missing in ESCAPE statement.</p> <p>The ESCAPE statement requires extra keywords to specify the dest</p> <ul style="list-style-type: none">- ESCAPE TOP- ESCAPE BOTTOM or ESCAPE BOTTOM IMMEDIATE- ESCAPE ROUTINE or ESCAPE ROUTINE IMMEDIATE <p>See the NATURAL Reference Manual for more information.</p> <p>Check program and correct error.</p>

NAT0234	<p>Ein 'ERE SET' muß mit einem Kategorienamen beginnen.</p>

Natural Fehlermeldungen 3.1.1

	<p>'ERE SET' must start with a category name.</p> <p>In a FIND statement, after the FIND header for an ENTIRE view, the syntax logic searches for components called 'ERE SET's. An 'ERE SET' begins with a view name and ends with a search criterion. The search criterion finishes when a NATURAL keyword or the view name of the next 'ERE SET' is encountered. When neither of these conditions is met, this error appears; and the syntax analysis cannot proceed.</p> <p>Check source code and correct error.</p>
NAT0235	<p>Die ISN muß ein Ganzzahl-Wert sein.</p> <p>ISN must be an integer value.</p> <p>In a FIND statement, ISN values in the RELATIONSHIP or ISN clauses of the basic search criterion must be integer values. The ISNs to be found are only numeric.</p> <p>For further information, please refer to the FIND statement, RELATIONSHIP and ISN clauses of the basic search criterion, in the ENTIRE DB Programmer's Guide.</p> <p>Correct error in program.</p>
NAT0236	Gleichheitszeichen (=) fehlt nach ENTIRE-Schlüsselwort.

Natural Fehlermeldungen 3.1.1

	<p>Equal sign '=' missing after ENTIRE keyword.</p> <p>This error can occur in two ENTIRE statements:</p> <p>1) FIND view-name WITH ISN = 12335 The equal sign is necessary in the ISN clause of the basic search criterion of the FIND statement.</p> <p>2) DLOGON USER = 'XXX' PASSWORD = 'YYY' LIBRARY = 'LLL' APPLICATION = 'AER' AUTHORIZATION = A In this syntax form of the DLOGON statement, the equal sign must follow each keyword.</p> <p>For further information, see FIND and DLOGON statements in the ENTIRE DB Programmer's Guide.</p> <p>Correct error in program.</p>
NAT0237	Entsprechende offnende/schließende Klammer fehlt.
	<p>Unmatched closing parenthesis.</p> <p>ENTIRE DB checks whether each opening parenthesis is paired with a corresponding closing parenthesis.</p> <p>Correct error in program.</p>
NAT0238	<p>Ungültiger Operator in Deskriptor-Suchkriterium.</p> <p>Invalid operator in descriptor search criterion.</p> <p>In a FIND statement, the following operators are valid in a descriptor search criterion:</p> <ul style="list-style-type: none">= (equal to)^= (not equal)> (greater than)>= (greater equal) <p>In descriptor search criteria (following WITH), only the above operators are allowed after the attribute (NAME or LINE-NUMBER). See FIND statement in ENTIRE DB Programmer's Guide for further information.</p> <p>Correct error in program.</p>

Natural Fehlermeldungen 3.1.1

NAT0239	'Move'-Werte für ENTIRE müssen Ganzzahlwerte sein. Move values for ENTIRE must be integer values. A move value is a constant or variable moved into the search buf of an ENTIRE call at runtime. When this message appears, a numeric value is expected: integer, numeric unpacked or packed without decimal digits, but not binar Correct error in program.
NAT0240	Alphanumerisches Format erwartet. Alphanumeric format expected here. This constant or variable must be of alphanumeric format. For further information on valid formats for FIND and DLOGON statements, see ENTIRE DB Programmer's Guide. Correct error in program.
NAT0242	Öffnende Klammer '(' fehlt. Open bracket '(' expected. ENTIRE DB checks for open parentheses in the NATIVE and RELATION clauses of the FIND statement. Clause elements must be enclosed parentheses. See FIND statement in the ENTIRE DB Programmer's Gu for further information. Correct error in program.
NAT0243	Syntaxfehler in DEFINE DATA-Statement/-Struktur. Syntax error in DEFINE DATA statement/structure. See NATURAL Reference Manual for information on DEFINE DATA synt Check program and correct error.
NAT0244	Nach 'GLOBAL' muß 'USING' und der GDA-Name stehen.

Natural Fehlermeldungen 3.1.1

	<p>'GLOBAL' must be followed by 'USING' and GDA name.</p> <p>A global data area (GDA) is always a separate object, never part of the data definition within the DEFINE DATA statement of a program. The GDA is referenced in the GLOBAL clause of the DEFINE DATA statement with the following syntax:</p> <pre>DEFINE DATA GLOBAL USING name-of-gda ... END-DEFINE</pre> <p>Check program and correct error.</p>
NAT0245	Falsche Benutzung/Reihenfolge der Klauseln im DEFINE DATA.
	<p>Invalid use/order of clauses in DEFINE DATA statement.</p> <p>The sequence of clauses in the DEFINE DATA statement is:</p> <pre>DEFINE DATA GLOBAL USING PARAMETER LOCAL</pre> <p>In a subsequent validation rule, only DEFINE DATA LOCAL is allowed.</p> <p>Make sure that the clauses are in the correct order.</p>
NAT0246	Unzulässige Konstanten- oder Variablenangabe.
	<p>Invalid usage of format 'C'/'L' variable.</p> <p>Data types 'C' (control) and 'L' (logic) can not be used in the following statements:</p> <ul style="list-style-type: none">- GET TRANSACTION DATA- END TRANSACTION- SORT. <p>Check program and correct error.</p>
NAT0247	Fehler in automatischem Parameter :1: für Map.

Natural Fehlermeldungen 3.1.1

	Error in automatic parameter ... for map. A parameter which is included for a constant input map or write without explicit parameter specification is invalid or undefined Correct error in program.
NAT0248	Ungültige USING-Variable in PROCESS-Statement. Invalid USING variable in PROCESS statement. The left part of the ASSIGN variable in the USING clause of the statement must be part of the view defined to NATURAL PROCESS. Check program and correct error.
NAT0249	Fehler in 'ASSIGN' bei NATURAL PROCESS 'USING'-Klausel. Error in 'ASSIGN' of NATURAL PROCESS 'USING' clause. Check program and correct error.
NAT0250	Fehlerhafte GIVING-Klausel in PROCESS-Statement. Error in GIVING clause of NATURAL 'PROCESS' statement. Check program and correct error.
NAT0251	Datei/DDM ist für PROCESS-Statement nicht definiert. File/DDM not defined for PROCESS statement. Check program and correct error.
NAT0252	Angabe einer Library in Security-Umgebung nicht erlaubt. Library must not be specified in security environment. In an environment which is protected by NATURAL SECURITY, the specification of a library is not possible. Do not specify a library.
NAT0253	Statement bei Zugriff auf DB2 nicht erlaubt.

Natural Fehlermeldungen 3.1.1

	<p>Statement not allowed for DB2 access.</p> <p>The following statements and constructions are not supported by</p> <ol style="list-style-type: none">1. FIND UNIQUE2. FIND COUPLED3. FIND FIRST4. FIND ... RETAIN AS5. GET6. any reference to *ISN7. END TRANSACTION within an open database loop8. BACKOUT TRANSACTION within an open database loop <p>Correct error in program.</p>
NAT0254	Zielfeld von VAL-Funktion hat ungültiges Format.
	<p>Receiving field of VAL function has invalid format.</p> <p>The format and length must be the same as that of the target. This mathematical function extracts the numeric value from an alphanumeric field. The content of the alphanumeric field must be the character representation of a numeric value. Leading or trailing blanks are permitted. Decimal point and leading sign character will be processed.</p> <p>Do not use formats A (alphanumeric) or B (binary).</p>
NAT0255	Allgemeiner Syntaxfehler im Programm.
	<p>General syntax error detected in program.</p> <p>A general syntax error was detected while syntax checking a source program.</p> <p>This message is output for various miscellaneous syntax errors for which NATURAL does not provide specific error messages.</p> <p>Check program and correct error.</p>
NAT0256	Unzulässiges Kommando; oder 'ADHOC' fehlt im Batch-Modus.

Natural Fehlermeldungen 3.1.1

	<p>Invalid entry in command line.</p> <p>The structure of the command does not require the parameters that have been specified in the command line.</p> <p>NATURAL checks that the parameter specification agrees with the parameter structure expected by the individual command.</p> <p>Another reason for this error is that ADHOC is missing in batch</p> <p>Check command structure and resubmit.</p>
NAT0257	Bei MASK/SCAN nur Operatoren 'EQUAL', 'NOTEQUAL' erlaubt.
	<p>Only operators 'EQUAL', 'NOTEQUAL' valid with MASK/SCAN.</p> <p>It is not possible to evaluate the operators GREATER or LESS THAN a value when only certain positions are included in the comparison. Therefore, the only logical operators that are allowed with the string compare function MASK and SCAN are 'EQUAL' and 'NOTEQUAL'.</p> <p>Restructure the logical criteria to only use operators 'EQUAL' or 'NOTEQUAL' with the functions MASK and SCAN.</p>
NAT0258	Fehlerhafter Aufbau des MASK-Arguments.
	<p>Incorrect MASK argument construction.</p> <p>The mask value must be enclosed in parentheses and may only contain the elements as described in the NATURAL Reference Manual (see also extended error message NAT0017).</p> <p>Check program and correct error.</p>
NAT0259	Falsche MASK-Konstruktion für Datumsprüfung.
	<p>Invalid MASK construction for date check.</p> <p>When a date check is to be performed, the specification for month/day/year must be 2 characters each (MM/DD/YY); for year, 4 characters (YYYY) may also be used.</p> <p>Check program and correct error.</p>
NAT0260	Fehler in Textlisten-Aufbau; Administrator verständigen.

Natural Fehlermeldungen 3.1.1

	<p>Error in text list construction; contact administrator.</p> <p>A discrepancy was detected in the number of alternative entries in the text list and the syntax list.</p> <p>The error is caused by an invalid modification of the text list.</p> <p>New entries can only be inserted in the text list by using the macro CSYN for synonym, not the macro CALT for alternative.</p> <p>Retain the keyword on which the error has been detected and contact your NATURAL administrator.</p>
NAT0261	<p>Das END-Statement fehlt.</p>
	<p>END statement missing.</p> <p>The last statement of a NATURAL program must always be END.</p> <p>Alternatively, a period '.' may be used.</p> <p>Check program and correct error.</p>
NAT0262	<p>Es sind maximal 29 Stellen (7 Nachkommastellen) erlaubt.</p>
	<p>Incorrect number of digits/value out of range.</p> <p>For a field of format N or P, the overall maximum number of digits is 29, and the maximum number of digits after the decimal point is 7.</p> <p>For a field of format F the value specified must be in the range values as described in the NATURAL Reference Manual, Chapter General Information, Section Floating Point Constants</p> <p>Correct error in program.</p>
NAT0263	<p>Fehlerhafter MASK-Aufbau für eine Bereichsprüfung.</p>

Natural Fehlermeldungen 3.1.1

	<p>Invalid MASK construction for range check.</p> <p>If a range check is to be performed, both values for the supplied range must have the same number of positions. Leading zeros must be supplied, as it is a check for positions in the value and the number of digits supplied in the range value. The number of positions to be included in the range check must also be specified.</p> <p>Check program and correct error.</p>
NAT0264	<p>Alphanumerische Konstanten dürfen 1 - 253 Zeichen haben.</p> <p>Length of alphanumeric constant 0 or > 253 characters.</p> <p>The length of an alphanumeric constant must be from 1 to 253 characters.</p> <p>Check program and correct error.</p>
NAT0265	<p>Anzahl der angegebenen Hexadezimalzeichen ist ungerade.</p> <p>Odd number of hexadecimal characters specified.</p> <p>Hexadecimal notation for literal constants requires that 2 characters be used to represent the content of 1 byte internally. Consequently, a hexadecimal notation must contain an even number of characters.</p> <p>Correct error.</p>
NAT0266	<p>Durch hexadezimale Konstante mehr als 80 Bytes definiert.</p> <p>Number of bytes defined by hexadecimal constant > 80.</p> <p>Hexadecimal constants are converted to internal byte representation in an intermediate buffer of 80 bytes. If literal constants of more than 80 bytes internal representation are to be defined, use the notation 'XXXXXX'-'XXXXXX' to enter the value in multiple segments.</p> <p>Check program and correct error.</p>
NAT0267	<p>Ungültige Dateiangabe in der COUPLED-Klausel.</p>

Natural Fehlermeldungen 3.1.1

	<p>Invalid file specification in COUPLED clause.</p> <p>The file specified in a COUPLED clause must be an ADABAS file which has been physically coupled using the appropriate ADABAS utility program. The file must not be a logical NATURAL system file.</p> <p>Check program and correct error; or contact your NATURAL administrator about the file status.</p>
NAT0268	Falsches Format/Länge für Datenbank-Zähler-Variable.
	<p>Invalid format/length for database count variable.</p> <p>The format of the count variable for a periodic-group name or multiple-value field must be N or P. No decimal digits are permitted.</p> <p>Check program and correct error.</p>
NAT0269	Ungültiger Deskriptor in SORTED BY-Klausel.
	<p>Invalid descriptor in SORTED BY clause.</p> <p>The descriptor specified in the SORTED BY clause cannot be within a periodic group. If the descriptor is a multiple-value field, an index value must not be used.</p> <p>Check program and correct error.</p>
NAT0270	Unzulässige Verwendung einer variablen Index-Notation.
	<p>Invalid use of variable index notation.</p> <p>Variable index notation is not permitted with a search variable in the WITH clause of a FIND statement.</p> <p>Check program and correct error.</p>
NAT0271	Die DISPLAY-Ausgabe überschreitet die Seitenbreite.

Natural Fehlermeldungen 3.1.1

	<p>Page width (line size) exceeded in DISPLAY statement.</p> <p>The total number of positions required for all columns resulting from a DISPLAY statement must not exceed the logical page size.</p> <p>Reduce number of fields being displayed, or reduce spacing between columns, or increase the logical page size (where applicable), or place multiple values vertically in the same column.</p>
NAT0272	<p>Unzulässiges Wertformat oder inkompatibles Feldformat.</p>
	<p>Invalid value format or incompatible field format.</p> <p>In a SCAN operation, the format of the value to be scanned for mode 'A' or 'B'; the format of the field to be scanned must be 'A', 'P'. The length of the value must be less than the length of the field. The format combination in a WHERE, IF, ACCEPT, REJECT criterion is incompatible.</p> <p>Check program and correct error.</p>

There is an inconsistency between your NATURAL nucleus and your NATURAL system file (FNAT). The nucleus is marked as non-SECURITY but the NATURAL system file contains NATURAL SECURITY-specific parameters. Possible reasons for this inconsistency are: - the nucleus has been illegally zapped. - the NATURAL master control record has been illegally zapped. - the NATURAL SECURITY NATLOAD has not been performed successfully. Contact your NATURAL administrator. Repeat the NATLOAD for NATURAL and - if your system is a NATURAL SECURITY one - also repeat the NATLOAD for NATURAL SECURITY.
NAT0867	Mailbox nicht existent / nicht ihrer Session zugeordnet.

Natural Fehlermeldungen 3.1.1

	<p>NATURAL VSAM initialization failed.</p> <p>The reason for this failure is explained by the more detailed error message issued together with this error message.</p> <p>See explanation of detailed message.</p>
NAT3600	<p>Address of program starting asynchronous task is missing.</p> <p>Address of program starting asynchronous task is missing.</p> <p>A master file definition specified that an asynchronous task is to be started after an update to the master file has been committed by means of an ADABAS ET command.</p> <p>The address of the program used to start such a task has not been specified correctly in the ETP 3GL interface initialization call.</p> <p>Specify the correct address of a program used to start an asynchronous task in the ETP 3GL interface initialization call.</p>
NAT3601	<p>Updating the distribution key of a master file is not allowed.</p> <p>Updating the distribution key of a master file is prohibited.</p> <p>If a distribution key is defined for a master file, it may be contained in any view used to update the master file, but the distribution key field itself may not be updated.</p> <p>Use a sequence of DELETE and STORE statements instead of UPDATE in the application programs to update the distribution key field</p>
NAT3602	Using more than one log file in a transaction not allowed.

Natural Fehlermeldungen 3.1.1

	<p>Using more than one log file in a transaction not allowed.</p> <p>The "Verify transaction consistency during logging" field is set to "Y" (yes) and two or more master files that were updated in the same transaction have different log files assigned.</p> <p>Action: Either set the "Verify transaction consistency ..." field to "N" using the MODIFY SYSPROF function or modify your master definitions so that all master files that are updated in a single transaction have the same log file assigned.</p>
NAT3603	<p>Concurrent updates to more than one database are not allowed.</p> <p>Concurrent updates to more than one database are not allowed.</p> <p>It is not allowed to update master files that are contained in different databases in the same transaction. Transaction consistency cannot be guaranteed for such operations.</p> <p>Change the application programs so that a transaction contains only updates to a single database.</p>
NAT3604	<p>Length of format buffer or record buffer exceeds allowed maximum</p> <p>Length of format buffer or record buffer exceeds allowed maximum</p> <p>Format and record buffer for an update call logged by ETP may not exceed a maximum value.</p> <p>Split your NATURAL views or the format and record buffers supplied by a 3GL program into smaller portions and issue multiple ADABAS calls.</p>
NAT3605	Administration file is not defined.

Natural Fehlermeldungen 3.1.1

	<p>Administration file is not defined.</p> <p>To use ETP, an administration file has to be assigned to logical file number 200 for NATURAL applications. For 3GL applications, the administration file has to be specified as a parameter for an initialization call to the ETP 3GL interface.</p> <p>ACTION: For a NATURAL application, use the NATURAL LFILE parameter or the NTFILE macro to specify the ETP administration file.</p> <p>For a 3GL application, specify the administration file correctly in the ETP 3GL interface initialization call.</p>
NAT3606	GETMAIN failed for ETPSIZE.
	<p>GETMAIN failed for ETPSIZE.</p> <p>For an NTDB macro or for the NATURAL DB parameter, the ETP option is specified for at least one database.</p> <p>Entire Transaction Propagator (ETP) is not be able to run, because the required storage could not be obtained.</p> <p>Restart NATURAL in a larger environment: Increase your region size or increase the size of your NATURAL transaction when running in a thread environment.</p>
NAT3607	Error during start of asynchronous task after ET.
	<p>Error during start of asynchronous task after ET.</p> <p>After an ADABAS ET command, ETP tried to start an asynchronous task because the definition of a master file that was updated in the completed transaction requested so. The program that was executed ended with an error.</p> <p>Check the task name specified in the ETP system profile. Verify that a transaction with that name is in a library that is accessible from the current TP monitor session.</p>
NAT3608	The ETP identification record is invalid or missing.

Natural Fehlermeldungen 3.1.1

	<p>The ETP identification record is invalid or missing.</p> <p>When invoked for the first time, the ETP maintenance utility writes an identification record into the administration file, which is never deleted by ETP.</p> <p>If the error occurred during logging of transactions, the ETP identification record has been deleted, but other information in the administration file still exists.</p> <p>If the error occurred when you invoked the ETP maintenance utility, you attempted to access an ETP administration file with an old version of the ETP maintenance utility after it had been accessed with a newer version.</p> <p>ACTION: If the error occurred during logging of transactions, invoke the ETP maintenance utility and verify that all information contained in the administration file is still correct. If the error occurred when you invoked the ETP maintenance utility, use only the newer version of the maintenance utility to access the administration file.</p>
NAT3609	Invalid ISNQ value for S1 cmd on obtaining replicate ISN.
	<p>Invalid ISNQ value for S1 cmd on obtaining replicate ISN.</p> <p>The file definition requested that the criterion used to replicate records is the distribution key defined for the replicate's master file. The distribution key must be a unique descriptor. To replicate the record, the ISN of the record in the replicate file is retrieved. For N1 calls (STORE), no record with that key may be present. For A1/E1 (UPDATE/DELETE), exactly one record with that key must be present.</p> <p>As the record's ISN was retrieved, ETP encountered an invalid ISN value, meaning that for an N1 call a record with the key already exists or for an A1/E1 command either no or more than one record with that key exists in the replicate file.</p> <p>The reason for this error is usually that an application program modified the replicate file (which is not allowed) or ADABAS utilities were used to modify the replicate file.</p> <p>Re-initialize the replicate file from the master file as described in the manual and, if necessary, correct your application program.</p>
NAT3691	Module :1: not found.

Natural Fehlermeldungen 3.1.1

	<p>Module ... not found.</p> <p>This error may be caused by one of the following:</p> <ul style="list-style-type: none">- The module as indicated in the error message is missing in the link-edit stream.- The CSECT instruction is missing in the source of the module.- The module name in the CSECT instruction has been changed. <p>Make sure that the module is included in the link-edit stream; make sure that the source of the module is complete/correct.</p>
NAT3692	Error :1: in GETMAIN for USER DB buffer.
	<p>Error ... in GETMAIN for USER DB buffer.</p> <p>An error occurred when the USER DB interface attempted to acquire its buffer from the thread.</p> <p>Increase the size of the thread.</p>
NAT3693	Error :1: in GETMAIN for USER DB interface subpool :2:.
	<p>Error ... in GETMAIN for USER DB interface subpool</p> <p>An error occurred when the USER DB interface attempted to acquire from its buffer the subpool as indicated in the error message.</p> <p>Contact Software AG support.</p>
NAT3694	No DBID marked as USER DB in NTDB macro.
	<p>No DBID marked as USER DB in NTDB macro.</p> <p>NATURAL has been invoked, but in the NTDB macro no database has been reserved for the USER DB.</p> <p>Correct error in NTDB macro.</p>
NAT3695	USER DB interface initialization failed.

Natural Fehlermeldungen 3.1.1

	<p>USER DB interface initialization failed.</p> <p>The reason for this failure is explained by the more detailed error message issued together with this error message.</p> <p>See explanation of detailed message.</p>
NAT3696	<p>Statement not supported.</p> <p>Statement not supported.</p> <p>1. The NATURAL program contains a statement which is not supported. 2. The NATURAL nucleus issued a request to the USER DB interface to execute an invalid ADABAS command.</p> <p>Check program and correct error. If necessary, contact Software AG support.</p>
NAT3697	<p>CID table size exceeded.</p> <p>CID table size exceeded.</p> <p>The USER DB interface attempted to store a new command ID in its COMMAND ID table. No empty entry was found in this table.</p> <p>Increase the size of the CID table by means of the LOOPNUM parameter in the parameter module UDBPARM.</p>
NAT3698	<p>USER DB has not been initialized.</p> <p>USER DB has not been initialized.</p> <p>USER DB service has been requested, but the USER DB has not been initialized.</p> <p>Install the USER DB correctly and then restart NATURAL session.</p>
NAT3699	<p>USER DB error :1: , :2: encountered.</p>

Natural Fehlermeldungen 3.1.1

	<p>USER DB error ... , ... encountered.</p> <p>The USER DB interface was passed an error from the USER DB.</p> <p>Correct the error in the USER DB.</p>
NAT3700	<p>Fehler :1: bei DB2-Aufruf.</p> <p>Error ... with SQLSTATE ... from call to ...</p> <p>Each non zero SQLCODE is reported with this error message.</p> <p>Execute the program SQLERR to display the SQLCODE and the related tokens. See the relevant IBM literature for an explanation of the error condition.</p>
NAT3701	<p>NATURAL DB2 Schnittstellen-Fehler.</p> <p>NATURAL SQL interface error with reason code ...</p> <p>Reason Codes:</p> <p>3nnn - See corresponding NATURAL error message number.</p> <p>100 - Invalid I/O request.</p> <p>101 - UPDATE/DELETE statement too long for dynamic execution.</p> <p>102 - GETMAIN failed: increase region size, or MEMRES (only COM)</p> <p>201 - Statement not supported.</p> <p>202 - SELECT not found or cursor not opened.*</p> <p>203 - Severe internal error.*</p> <p>204 - Too many nested database loops: increase STATEMENT TABLE.</p> <p>205 - SQLID could not be set.</p> <p>206 - Database ID '250' is not a DB2 or SQL/DS database.</p> <p>* may be caused by END/BACKOUT TRANSACTION inside a database loop.</p> <p>Contact Software AG</p>
NAT3702	Ungültiges gepacktes Feld.

Natural Fehlermeldungen 3.1.1

	<p>Invalid packed field.</p> <p>Fields defined with packed format must be in the form 'nn.m'. 'nn' represents the number of digits before the decimal point, and 'm' represents the number of digits after the decimal point. The aggregate value of 'nn' and 'm' must not exceed 27, and the value of 'm' must not exceed 7.</p> <p>Check program and correct error.</p>
NAT3703	<p>Das Feld wurde von einem anderem Benutzer geändert.</p> <p>Field has been modified by another user.</p> <p>The UPDATE command to DB2 checks if the record contents is still identical to what the user had read before. Because of the automatic 'COMMIT' issued by IMS or CICS pseudo-conversational mode at terminal I/O time, the 'hold' status of the record is lost and the record is free to be modified by another NATURAL then cancels the current transaction with this error message.</p> <p>Retry this operation.</p>
NAT3704	<p>Nach automatischem COMMIT ist kein Ändern möglich.</p> <p>Update not possible after automatic COMMIT.</p> <p>NATURAL tries to re-read a given DB2 record after a terminal I/O which has caused IMS or CICS in pseudo-conversational mode to issue an automatic COMMIT. This COMMIT loses the current record. The re-reading is only possible if the record can be identified via a unique index and the corresponding fields are all read into the data view.</p> <p>Update the record before the automatic COMMIT, or add a unique-index field to your data view.</p>

NAT4238	<p>Coupled-File-Einträge im DDM für VSAM nicht erlaubt.</p> <p>Coupled file entry not allowed.</p> <p>In VSAM processing, coupled file entries in the DDM are not allowed.</p> <p>Remove the coupled file entries.</p>
NAT4239	<p>Ungültige Zeichen im 'Alternate Index'-Dateinamen.</p> <p>Illegal characters in alternate index file name.</p> <p>The correct syntax for the alternate index file name requires that the first character be alphanumeric; the following character may either be alphanumeric or numeric.</p> <p>Enter correct file name.</p>
NAT4240	<p>DBIDs müssen voneinander verschieden sein.</p> <p>DBID numbers must exclude one another.</p> <p>When copying files, the database identifications (DBIDs) of the files must be different from one another.</p> <p>Enter correct DBID.</p>
NAT4241	<p>Primärschlüssel darf nur einmal definiert werden.</p> <p>Primary key has been defined twice.</p> <p>In VSAM processing, only one field may be specified as primary key.</p> <p>Define only one primary key.</p>
NAT4242	<p>Feldtyp des Primärschlüssel-Feldes muß '' sein.</p>

Natural Fehlermeldungen 3.1.1

	<p>Type must be blank.</p> <p>In VSAM processing, the type of the field where the primary key specified must be specified with a blank character.</p> <p>Change type to a blank character.</p>
NAT4243	<p>Im DDM muß ein Primärschlüssel angegeben werden.</p> <p>Primary key has not been specified.</p> <p>In VSAM processing, one primary key must be specified in the DDM</p> <p>Enter one primary key field.</p>
NAT4244	<p>Ein Name im DDM darf nicht doppelt vorkommen.</p> <p>Duplicate name in DDM not possible.</p> <p>There is a name in the DDM which is specified twice.</p> <p>Change the name which is specified twice.</p>
NAT4245	<p>Der CICS-Dateiname fehlt.</p> <p>The CICS file name is missing.</p> <p>The CICS file name in the definition of the file entry is missin</p> <p>Enter the CICS file name.</p>
NAT4246	<p>Sie müssen hier entweder 'Y' oder 'N' eingeben.</p> <p>Only 'Y' or 'N' may be entered in this field.</p> <p>In this field, you may only enter 'Y' (for YES) or 'N' (for NO).</p> <p>Enter 'Y' or 'N'.</p>
NAT4247	<p>Im DDM angegebene Periodengruppe steht nicht in der FDT.</p>

Natural Fehlermeldungen 3.1.1

	<p>Periodic group is not in FDT.</p> <p>There is a periodic group specified in the DDM which does not appear in the corresponding Field Description Table (FDT).</p> <p>Check DDM for the specified periodic group.</p>
NAT4248	<p>Unique Key Flag/Null Flag nur bei VSAM-Upgrade möglich.</p> <p>Use unique key flag/null flag only for VSAM upgrade.</p> <p>The unique key flag and the null flag can only be specified if the upgrade flag has been signed. This is only meaningful if the field has an alternate index.</p> <p>Specify correct combination of flags.</p>
NAT4249	<p>Unzulässige Format- oder Längenangabe.</p> <p>Invalid format or length.</p> <p>Only the following format/length combinations are valid:</p> <ul style="list-style-type: none">- INTEGER (I4)- FLOAT (F4/F8)- DATE- TIME- LOGICAL (L1). <p>Check DDM and correct error.</p>
NAT4250	<p>Das Zeichen in der Deskriptor-Spalte ist ungültig.</p>

Natural Fehlermeldungen 3.1.1

	<p>Invalid character in descriptor option.</p> <p>In column D, only the following values are allowed:</p> <ul style="list-style-type: none">D - descriptorS - subdescriptor or superdescriptorP - phonetic descriptor'' - not a descriptor <p>And for VSAM files:</p> <ul style="list-style-type: none">P - primary indexA - alternate index <p>Enter valid descriptor option.</p>
NAT4251	Der angegebene Aktionscode ist nicht zulässig.
	<p>Invalid action code specified.</p> <p>Only the action codes displayed on the selection menu may be specified.</p> <p>Enter valid action code.</p>
NAT4252	Die LIST-Funktion wurde ausgeführt.
	<p>LIST function executed.</p> <p>No action required.</p>
NAT4253	Es ist eine Dateinummer zwischen 1 und 255 anzugeben.
	<p>Invalid file number specified.</p> <p>The database file number must be specified as a number between 1 and 255.</p> <p>Enter valid file number.</p>
NAT4254	Datenbank-IDs müssen verschieden und nicht '0' sein.

Natural Fehlermeldungen 3.1.1

	<p>DBID numbers must be different and cannot be '0'.</p> <p>The database number must be specified as a number between 1 and 253 (DBID=254 indicates a VSAM file; DBID=255 indicates a logical file).</p> <p>Enter a valid database number.</p>
NAT4255	<p>File Definition im Data Dictionary nicht vorhanden.</p> <p>File definition does not exist in data dictionary.</p> <p>The referenced file definition cannot be found in the data dictionary. Either a wrong name was specified or the data dictionary entry has not yet been defined.</p> <p>Enter valid file name from data dictionary.</p>
NAT4256	<p>Ungültiger Systemdatei-Typ.</p> <p>Invalid type of system file.</p> <p>The following values are valid for specifying the type of system file:</p> <ul style="list-style-type: none">A - ADABAS system fileV - VSAM system file <p>Specify correct value for system file type.</p>
NAT4257	<p>Dies ist ein ungültiger Name für eine VSAM-Systemdatei.</p> <p>Invalid name for VSAM system file.</p> <p>A valid name for the VSAM system file is required.</p> <p>This name is the same as specified in the NATURAL parameter module with the VSAM parameter (VSAM=name of VSAM system file).</p> <p>Specify correct name of VSAM system file.</p>
NAT4258	<p>Quell- und Zielangabe müssen verschieden sein.</p>

Natural Fehlermeldungen 3.1.1

	<p>Source and target destination must be different.</p> <p>When copying programs, modules, or DDMs with the NATURAL utility SYSMAIN or SYSDDM, a valid source and target destination must be specified. Target destinations may be DBID, FNR, System File Typ System File Name (in case of VSAM system file).</p> <p>The source and target destination may not have the same values.</p> <p>Specify correct source and target destination.</p>
NAT4259	Länge des DDMs überschreitet 64K.
	<p>DDM length exceeds 64K.</p> <p>The length of a DDM may not exceed 64K.</p> <p>Reduce the size of the DDM.</p>
NAT4261	DDM kann nicht gelesen/gelistet werden; FSIZE zu klein.
	<p>View cannot be read/listed; FSIZE is too small.</p> <p>The view that is to be read/listed is too large to fit into the current File Buffer. This error may occur when reading a view with an online utility, listing a view with a command, or incorporating a view into a NATURAL object with an editor.</p> <p>Reduce the specifications in the file definition, or increase the value for the FSIZE parameter.</p>
NAT4262	Dateidefinition existiert bereits im Data Dictionary.
	<p>File definition already exists in data dictionary.</p> <p>A duplicate name for a file definition entry in the data dictionary was specified.</p> <p>Enter different file name or delete existing entry. If necessary use the REPLACE option to overwrite the existing file definition</p>
NAT4263	Dupl. file number for physical DDM not allowed.

Natural Fehlermeldungen 3.1.1

	<p>Dupl. file number for physical DDM not allowed.</p> <p>The file number for a physical DDM must be unique. Duplicate file numbers are only allowed in the case of user views where the file number must be the same for the user v and the related physical (logical) DDM.</p> <p>Correct the file number or. in the case of a user view, specify 'USERVIEW=Y' in the DDM.</p>
NAT4264	<p>There is no physical file with the given file number.</p> <p>There is no physical file with the given file number.</p> <p>In constructing a logical file, during the CATALOG action, you h to specify the file number of the related physical file.</p> <p>Either specify another file number or create a file with this number.</p>
NAT4265	<p>File related to the user view does not exist.</p> <p>File related to the user view does not exist.</p> <p>The file number used during user view creation must represent an existing physical file.</p> <p>Use correct file number.</p>
NAT4266	<p>Logical file must be of type KSDS or VRDS.</p> <p>Logical file must be of type KSDS or VRDS.</p>
NAT4267	<p>File number is missing for related physical file :1:.</p> <p>File number is missing for related physical file</p> <p>Each logical file must refer to a physical file.</p> <p>Check file number.</p>
NAT4268	<p>Only K,E,R,V (file-org); Y,N (compression) allowed.</p>

Natural Fehlermeldungen 3.1.1

	<p>Only K,E,R,V (file-org); Y,N (compression) allowed.</p> <p>For File Organisation, you can only enter K,E,R,V. For Compression, you can only enter Y=yes, N=no.</p> <p>Enter a valid value.</p>
NAT4269	<p>Y (compression) only allowed for KSDS, ESDS, VRDS files.</p> <p>Y (compression) only allowed for KSDS, ESDS, VRDS files.</p>
NAT4270	<p>Duplicate long field name not allowed.</p> <p>Duplicate long field name not allowed.</p> <p>Long names of fields must be unique.</p>
NAT4271	<p>Fehler nicht direkt korrigierbar. Editieren Sie das DDM.</p> <p>Error not directly corrigible. Press ENTER to edit DDM.</p> <p>The error cannot be corrected interactively while processing the file definition.</p> <p>Use the editor to correct the error, and then repeat the desired action.</p>
NAT4272	<p>Spezialoption/Deskriptor für Periodengruppe nicht möglich.</p> <p>Periodic group cannot be descriptor or have special option.</p> <p>For a periodic group, a descriptor or a value for the special option must not be specified.</p> <p>Check whether the field is a group; if it is and should be, spec values for descriptor and/or special option.</p>
NAT4274	<p>Das Feld gehört nicht zu dieser Periodengruppe.</p> <p>Field is not member of this periodic group.</p> <p>Correct the field (level).</p>
NAT4275	<p>Dieses Feld ist Teil einer Periodengruppe.</p>

Natural Fehlermeldungen 3.1.1

	<p>Field is member of a periodic group.</p> <p>Correct field.</p>
NAT4277	<p>Dieses Feld ist kein multiples Feld.</p>
	<p>Field is not a multiple-value field.</p> <p>In the FDT (Field Description Table), the field is not a multiple-value field.</p> <p>Specify the correct type of the field.</p>
NAT4278	<p>Die Level-Nummer muß immer um 1 erhöht werden.</p>
	<p>Level number must be incremented consecutively.</p> <p>The difference between two level numbers must be '1'.</p> <p>Correct the level number.</p>
NAT4279	<p>Das im DDM angegebene Feld ist in der FDT nicht vorhanden.</p>
	<p>The field specified in the DDM is not in the FDT.</p> <p>The field specified in the DDM does not exist in the corresponding Field Description Table (FDT).</p> <p>Check whether the correct field has been specified.</p>
NAT4280	<p>Das Format muß alphanumerisch (A) sein.</p>
	<p>Format must be alphanumeric (A).</p> <p>In the FDT, the format is specified as alphanumeric, and the format in the DDM must be the same as in the FDT.</p> <p>Change the format to alphanumeric (A).</p>
NAT4281	<p>Primary key definition invalid for ESDS files.</p>

Natural Fehlermeldungen 3.1.1

	<p>Primary key definition invalid for ESDS files. Please refer to IBM literature for details.</p>
NAT4282	<p>RRDS files may not contain any keys. RRDS files may not contain any keys. Please refer to IBM literature for details.</p>
NAT4283	<p>KSDS file must contain at least one primary key. KSDS file must contain at least one primary key. Please refer to the IBM literature for details.</p>
NAT4285	<p>Eine Periodengruppe muß mit 'P' gekennzeichnet werden. Periodic group must be specified with 'P'. The indicator for a periodic group is 'P'. Specify the correct type, 'P'.</p>
NAT4287	<p>Dieses Feld ist kein Deskriptor. Field is not a descriptor. A wrong character has been specified in the descriptor field. Specify correct character for descriptor field: ' ' or 'D'.</p>
NAT4288	<p>Eine Gruppe muß mindestens ein Feld enthalten. A group must contain at least one field. A group must contain at least one field, or another group. Check the level or add fields to the group.</p>
NAT4289	<p>Sie dürfen dieses DDM nicht Listen oder Katalogisieren.</p>

Natural Fehlermeldungen 3.1.1

	<p>You are not allowed to LIST or CATALOG this DDM.</p> <p>You are not linked to the file in the NATURAL SECURITY System and, therefore, not allowed to LIST or CATALOG the DDM.</p> <p>Contact your NATURAL SECURITY administrator.</p>

NAT4845	Fehler NATnnnn bei der Verarbeitung von Objekt .

Natural Fehlermeldungen 3.1.1

	<p>A NATURAL error was returned during the normal SCAN/REPLACE procedure.</p> <p>If SCAN receives a NATURAL error code while scanning or replacing a specific object, this message will be returned with the specific NATURAL error code and the name of the object being processed when the error occurred.</p> <p>Examples of this type of error are:</p> <p>NAT0082 - The object selected was purged before it could be scanned. NAT3148 - The database was terminated during the scan process.</p> <p>Enter '? nnnn' for an explanation of error message NATnnnn. If necessary, contact your database administrator for additional information.</p>
NAT4846	<p>'Replace'-Operation durch NATURAL SECURITY verboten.</p> <p>'Replace' operation protected by security definition.</p> <p>To execute the REPLACE operation in a NATURAL SECURITY environment, the following NATURAL commands must be allowed in the appropriate user/application profile: READ, SAVE (and either EDIT or EDT).</p> <p>Contact your NATURAL SECURITY administrator and review the security profile which is in effect during the execution of SCAN.</p>
NAT4847	<p>Dieser Objekttyp ist durch NATURAL SECURITY geschützt.</p> <p>Object type is protected by security definition.</p> <p>NATURAL has a number of different object types for use with the various NATURAL facilities and functions; for example, 'P' for programs, 'N' for subprograms, 'G' for global data areas, etc.</p> <p>If a specific object type is entered for the SCAN function, SCAN will verify whether you have access to that object type by checking your security definition.</p> <p>Contact your NATURAL SECURITY administrator to review the NATURAL SECURITY profile in effect during the SCAN processing.</p>
NAT4848	Status der Programme/Module wurde erfolgreich angezeigt.

Natural Fehlermeldungen 3.1.1

	<p><i>Status of programs/modules displayed successfully.</i></p> <p><i>Status information on programs/modules in the user's library which meet the specified search criteria, has been successfully displayed.</i></p> <p><i>No action required.</i></p>
NAT4849	<p><i>Geben Sie das Datum in der Form 'YY-MM-DD' ein.</i></p> <p><i>Invalid date specification.</i></p> <p><i>The date was incorrectly entered. A date must be entered in the correct form for international date (YY-MM-DD).</i></p> <p><i>Enter correct date in correct form.</i></p>
NAT4850	<p><i>Der Startwert des Suchbereiches muß kleiner als der Endwert sein.</i></p> <p><i>Invalid range specification.</i></p> <p><i>The range for a search criterion was specified incorrectly. The start value must be less than or equal to the end value.</i></p> <p><i>Correct error.</i></p>
NAT4851	<p><i>Kein Programm/Modul mit angegebenen Kriterien gefunden.</i></p> <p><i>No program/module with specified criteria found.</i></p> <p><i>No program/module in the user's library meets the specified search criteria.</i></p> <p><i>Check data and specify search criteria more precisely.</i></p>
NAT4852	<p><i>NATURAL SECURITY erlaubt Ihnen diese Funktion nicht.</i></p> <p><i>Function disallowed by security definition.</i></p> <p><i>The desired function is disallowed by the NATURAL SECURITY application profile.</i></p> <p><i>Contact your NATURAL SECURITY administrator.</i></p>
NAT4853	<p><i>In der Library wurde kein Modul gefunden.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>No module found in library.</i></p> <p><i>While executing the SIZE command, no module which meets the search criteria was found.</i></p> <p><i>Check module name.</i></p>
NAT4854	<p><i>'Size'-Operation ist durch NATURAL SECURITY geschützt.</i></p> <p><i>'Size' operation protected by security definition.</i></p> <p><i>To execute the SIZE command in a NATURAL SECURITY environment, you must be allowed to use the command EXECUTE.</i></p> <p><i>Contact your NATURAL SECURITY administrator.</i></p>
NAT4855	<p><i>Kein Objekt gefunden, das die 'Scan'-Kriterien erfüllt.</i></p> <p><i>No objects found for specified 'scan' criteria.</i></p> <p><i>SCAN will do processing only according to the criteria specified. Only the objects which satisfy the specifications will be displayed; otherwise SCAN will return to the menu.</i></p> <p><i>No action required, since SCAN has terminated normally.</i></p>
NAT4856	<p><i>Ungültige Kombination von 'Object Name' und 'New Name'.</i></p> <p><i>Invalid field combination with 'rename' function.</i></p> <p><i>When you use the 'rename' function of SYSMAIN and have entered a specific name in the Object Name field, you must also enter a New Name. Alternatively, the range notation using a '?', '*' or '*' must be used; in which case no New Name is to be specified.</i></p> <p><i>Check values specified and correct error.</i></p>
NAT4857	<p><i>Dieser Dateityp ist für die angegebene Datei ungültig.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>File type is not valid for specified file.</i></p> <p><i>When using SYSMAIN only specific file types are supported. The file type is determined using the DBID and FILE number specified for the source and target files. Valid file types are:</i></p> <p style="text-align: center;"><i>ADABAS V4 DB2 SESAM VAX (ADABAS) ADABAS V5 DL1 USER VSAM</i></p> <p><i>Check the DBID and FILE number specified and correct them.</i></p>
NAT4858	<p><i>Der Zugriff auf diese Library ist Ihnen nicht erlaubt.</i></p>
	<p><i>Access to application is not allowed.</i></p> <p><i>When you use the SYSMAIN utility under NATURAL SECURITY, you are allowed to access a 'private library' of another user. Only access to your own (private) library is possible. This error occurs:</i></p> <ul style="list-style-type: none"><i>- if you perform the LIST/FIND function and attempt to select a private library; or,</i><i>- if you perform the COPY/MOVE/DELETE/RENAME function and have specified a private library as source/target library.</i> <p><i>Use only libraries which you are allowed to use.</i></p>
NAT4859	<p><i>Bei 'Rename' müssen alte und neue Daten verschieden sein.</i></p>
	<p><i>New 'rename' data must be different.</i></p> <p><i>When using the RENAME function of SYSMAIN, the new data of the object (saved or cataloged), profile or view must be different from the old data.</i></p> <p><i>Correct error.</i></p>
NAT4860	<p><i>Geben Sie einen Funktionscode oder ein Kommando ein.</i></p>
	<p><i>Enter either a valid function code or a command.</i></p> <p><i>Either a valid function code or a command must be entered in the appropriate fields.</i></p> <p><i>Enter either a valid function code or a valid command.</i></p>

Natural Fehlermeldungen 3.1.1

NAT4861	Geben Sie bitte einen gültigen Library-Namen ein. <i>Enter a valid library name.</i> <i>A library name must be specified.</i> <i>Check the library name specified and correct the error.</i>
NAT4862	Der Library-Name enthält ein unzulässiges Zeichen. <i>Invalid character in library name.</i> <i>A valid library name must be specified.</i> <i>An asterisk (*) or a question mark (?) indicating a range of val is not permitted.</i> <i>Enter a valid library name.</i>
NAT4863	Die Datenbank-ID muß zwischen 0 und 253 liegen. <i>Database identification must be 0 - 253.</i> <i>A valid database identification (DBID) must be specified.</i> <i>Valid DBIDs are:</i> <i>0 - default database</i> <i>1 - 253 - specific database.</i> <i>Enter a valid database identification.</i>
NAT4864	Die Dateinummer muß zwischen 1 und 255 liegen. <i>File number must be 1 - 255.</i> <i>A valid system file number in the range from 1 to 255 must be sp</i> <i>Enter a valid file number.</i>
NAT4865	Der angegebene Typ der NATURAL-Systemdatei ist ungültig.

Natural Fehlermeldungen 3.1.1

	<p><i>Invalid type of NATURAL system file.</i></p> <p><i>An invalid value for system file identification was entered. Possible values are:</i></p> <p><i>A - ADABAS system file, V - VSAM system file.</i></p> <p><i>Enter 'A' or 'V' as type of system file.</i></p>
NAT4866	<p><i>Ungültiger Name für Nicht-ADABAS-Systemdatei angegeben.</i></p> <p><i>Invalid name specified for file.</i></p> <p><i>If the NATURAL system file is not an ADABAS file, the name of the system file being accessed must be specified. This applies to the following system file types:</i></p> <p><i>V - VSAM 2 - DB2 U - USER D - DL/I S - SESAM</i></p> <p><i>Enter a value for the 'Name' field.</i></p>
NAT4867	<p><i>Kein Objekt erfüllt die angegebenen Kriterien.</i></p> <p><i>Nothing found for this request.</i></p> <p><i>Either no data meet the specified selection criteria, or you did not request any processing to be done from the selection screen. This is a normal termination message.</i></p> <p><i>No action required.</i></p>
NAT4868	<p><i>Die Funktion wurde erfolgreich beendet.</i></p> <p><i>Function completed successfully.</i></p> <p><i>The function has successfully terminated, and all data selected been processed normally.</i></p> <p><i>No action required.</i></p>

Natural Fehlermeldungen 3.1.1

NAT4869	<p><i>Nicht alle Module/Programme wurden verarbeitet.</i></p> <p><i>Not all module(s)/program(s) were processed.</i></p> <p><i>The function was not executed for all specified module(s)/program(s). Either the module specified in the selection menu was deleted in meantime by another user, or the module(s)/program(s) could not be overwritten because the REPLACE option was set to 'NO'.</i></p> <p><i>Correct error.</i></p>
NAT4870	<p><i>In der Kommandozeile ist ein Syntaxfehler.</i></p> <p><i>Syntax error in command line.</i></p> <p><i>A syntax error was detected when evaluating the command line during command processing: the command to be processed was not a valid command. Either you have entered a command which does not exist, or you have specified a command incorrectly (e.g. wrong sequence of parameters). The actual command being processed may be indicated in parentheses at the end of the error message.</i></p> <p><i>Check the command line and correct the error.</i></p>
NAT4871	<p><i>Der angegebene Objektname ist ungültig.</i></p> <p><i>Invalid object name specified.</i></p> <p><i>A valid name must be entered in the field 'Object Name' before processing can continue.</i></p> <p><i>Check data and correct error.</i></p>
NAT4872	<p><i>Keine XREF-Informationen für dieses Objekt gefunden.</i></p> <p><i>No XREF information found for object.</i></p> <p><i>The XREF indicator is set to either 'Y' or 'F', but the specific PREDICT (FDIC) file contains no XREF information for the object being processed.</i></p> <p><i>Check the FDIC file specified, the XREF indicator, and the status of the XREF information for the object in error.</i></p>

Natural Fehlermeldungen 3.1.1

NAT4873	<p><i>Die Libraries wurden erfolgreich aufgelistet.</i></p> <p><i>Libraries listed successfully.</i></p> <p><i>The libraries satisfying the specified search criteria were list successfully.</i></p> <p><i>No action required.</i></p>
NAT4874	<p><i>Wählen Sie eine der angezeigten Nummern aus.</i></p> <p><i>Selected number out of range.</i></p> <p><i>Only numbers displayed on the selection menu may be selected.</i></p> <p><i>Enter a valid number.</i></p>
NAT4875	<p><i>Dieses Programm existiert nicht.</i></p> <p><i>Program does not exist.</i></p> <p><i>No program exists for the selected number.</i></p> <p><i>Select another number.</i></p>
NAT4876	<p><i>Es wurden keine Libraries gefunden.</i></p> <p><i>No libraries found.</i></p> <p><i>No library was found which meets the search criteria.</i></p> <p><i>Verify search criteria.</i></p>
NAT4877	<p><i>Das Programm wurde erfolgreich aufgelistet.</i></p> <p><i>Program listed successfully.</i></p> <p><i>The NATURAL program was listed successfully.</i></p> <p><i>No action required.</i></p>
NAT4878	<p><i>Diese Funktion ist durch NATURAL SECURITY verboten.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Function not allowed by security definition.</i></p> <p><i>To execute the desired function in a NATURAL SECURITY environment the library to be processed must be either your 'private library' a public library, or a people-protected library of which you are an 'owner' (if co-owners exist, the required countersignatures must be obtained).</i></p> <p><i>Moreover, the use of the corresponding NATURAL commands - SAVE, STOW, SCRATCH, PURGE, UNCATALOG - must be allowed in that library.</i></p> <p><i>Do not use this function; or contact your NATURAL SECURITY administrator.</i></p>
NAT4879	<p><i>Im Batch-Betrieb ist keine Bereichsangabe erlaubt.</i></p> <p><i>Range not permitted in batch processing.</i></p> <p><i>When using the RENAME function of the utility SYSMAIN via a direct command in batch mode, a range of modules/programs must not be specified with the '*' or '?' notation.</i></p> <p><i>Do not use '*' or '?' notation in batch mode.</i></p>
NAT4880	<p><i>Geben Sie ein gültiges Kommando (oder '?' für Hilfe) ein.</i></p> <p><i>Enter valid command, or enter '?' for help.</i></p> <p><i>An invalid command was entered.</i></p> <p><i>For a list of valid command, you may enter a '?'.</i></p> <p><i>Enter a valid command, or enter a '?' for help.</i></p>
NAT4881	<p><i>Pflege des Buffer Pools war nicht möglich.</i></p> <p><i>Buffer pool maintenance failed.</i></p> <p><i>The NATURAL buffer pool maintenance failed, because the NATURAL pool is either not installed or has been disabled after an abend.</i></p> <p><i>Contact your NATURAL administrator.</i></p>
NAT4882	<p><i>Die Pflege des Buffer Pools wurde ausgeführt.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Buffer pool maintenance performed.</i></p> <p><i>Maintenance of the NATURAL buffer pool was performed.</i></p> <p><i>No action required.</i></p>
NAT4883	<p><i>Die TP-User-ID muß angegeben werden.</i></p> <p><i>TP user ID required.</i></p> <p><i>Enter a valid TP user ID.</i></p>
NAT4884	<p><i>Geben Sie eine Datenbank-ID zwischen 0 und 255 ein.</i></p> <p><i>Invalid database ID.</i></p> <p><i>A database identification in the range 0 - 255 must be entered.</i></p> <p><i>Enter a valid database identification.</i></p>
NAT4885	<p><i>Geben Sie eine Dateinummer zwischen 0 und 255 ein.</i></p> <p><i>Invalid file number.</i></p> <p><i>A file number in the range from 0 to 255 must be entered.</i></p> <p><i>Enter a valid file number.</i></p>
NAT4886	<p><i>Geben Sie bitte einen gültigen Library-Namen ein.</i></p> <p><i>Please enter a valid library name.</i></p> <p><i>A valid name for a NATURAL library must be entered.</i></p> <p><i>Enter a valid library name.</i></p>
NAT4887	<p><i>Geben Sie bitte einen gültigen Modulnamen ein.</i></p> <p><i>Please enter a valid module name.</i></p> <p><i>A valid name for a NATURAL module must be entered.</i></p> <p><i>Enter a valid module name.</i></p>
NAT4888	<p><i>Zur Zeit sind keine logischen Dateien verfügbar.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Currently no logical files available.</i></p> <p><i>The utility makes use of 'logical files' to perform any required processing. If all logical files are in use, processing is terminated abnormally. SYSPROF may be used to display the current file settings.</i></p> <p><i>Contact your database administrator for additional help.</i></p>
NAT4889	<p><i>Diese Applikation ist NATURAL SECURITY unbekannt.</i></p> <p><i>Application not defined to NATURAL SECURITY.</i></p> <p><i>You have requested access to an application which is not defined to NATURAL SECURITY.</i></p> <p><i>In the case of SYSMAIN, this may occur when you are maintaining applications which are defined to another security environment.</i></p> <p><i>If you want to do maintenance across security environments, you should use the SYSMAIN command 'CMD FSEC'.</i></p> <p><i>For further information, please refer to the NATURAL Administration Manual.</i></p> <p><i>Check the selection criteria and correct the error.</i></p>
NAT4890	<p><i>Gegenzeichnung des Owners/Co-owners ist ungültig.</i></p> <p><i>Invalid owner/co-owner confirmation.</i></p> <p><i>The countersignature specified for an owner-protected application must be valid for a co-owner to use an application; or the user is NOT an owner of the application.</i></p> <p><i>Specify the correct countersignature for the security environment being accessed.</i></p>
NAT4891	<p><i>Ungültige DBID und/oder FNR für diese Applikation.</i></p> <p><i>Invalid DBID and/or FNR specified for an application.</i></p> <p><i>The DBID and FNR specified for an application protected by NATURAL SECURITY must correspond to the DBID and FNR specified in the security profile for the application.</i></p> <p><i>Either correct DBID/FNR, or change the FSEC definition using the 'CMD FSEC' command.</i></p>

Natural Fehlermeldungen 3.1.1

NAT4892	<p>Diese Datei ist keine gültige PREDICT-Datei.</p>
	<p><i>Invalid PREDICT file(s) defined.</i></p> <p><i>The FDIC parameter is pointing to a database and/or file which is a valid file for PREDICT. This causes an error during the deletion of XREF data.</i></p> <ul style="list-style-type: none">- <i>If the FDIC parameter is correct, you should verify the settings of the SYSMAIN FDIC database(s) and/or file(s), since they will override the session FDIC parameter.</i> <p><i>Note that with XREF support the PREDICT version must be 2.3 or a higher version.</i></p> <ul style="list-style-type: none">- <i>If the XREF parameter is set to 'N', no check will be done on the XREF module.</i> <p><i>In batch, the nucleus should not have the XREF module linked.</i></p> <p><i>Check the current settings of the NATURAL parameter FDIC and the SYSMAIN FDIC parameters, and correct the error.</i></p>
NAT4893	<p>Normale Durchführung, aber nicht alle Daten verarbeitet.</p>
	<p><i>Normal completion, but some data were rejected.</i></p> <p><i>During processing of a function which does not result in the display of a selection screen, processing continues even if objects are rejected. There are numerous reasons why objects are rejected, and these are listed under error NAT4810. If you wish to monitor the status of each object as it is processed, use the selection screen (using the '?' option).</i></p> <p><i>This is a normal end-of-processing message.</i></p> <p><i>No action required.</i></p>
NAT4894	<p>Die angegebene 'FROM'-Fehlernummer ist ungültig.</p>

Natural Fehlermeldungen 3.1.1

	<p><i>Invalid error number specified.</i></p> <p><i>The FROM error number has been specified incorrectly: either no range notation has been specified, the FROM number is greater than the TO number, or the range notation is invalid.</i></p> <p><i>In batch, this error may also occur if any of the specified error numbers (ERROR FM, ERROR TO, NEW ERROR FM, NEW ERROR TO) are not numeric. Valid specifications of numeric numbers are:</i></p> <p style="text-align: center;"><i>1 or 01 or 001 or 0001</i></p> <p><i>Check the error number specifications, and correct the error.</i></p>
NAT4895	<p><i>Sprachcode muß 1 - 9 sein.</i></p>
	<p><i>Invalid language code specified.</i></p> <p><i>The language code specified is invalid. Refer to the NATURAL Reference Manual for further information on language codes.</i></p> <p><i>Enter a valid language code.</i></p>
NAT4896	<p><i>Funktion für diesen Fehler-Langtext nicht ausführbar.</i></p>
	<p><i>Invalid processing request for extended error message.</i></p> <p><i>When moving, copying or renaming an extended error message, there always be a corresponding short error message. If there is no short error message in the source environment, the extended error message will not be processed. If there is not short message in the target environment, this error message will be output.</i></p> <p><i>Processing of both, short and extended messages, together is valid.</i></p> <p><i>Correct error.</i></p>
NAT4897	<p><i>Die angegebene Fehler-Applikation ist ungültig.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Invalid error application specified.</i></p> <p><i>The specified error application is invalid for the requested function. It may be a non-existent application, or you have tried to move, or rename a user error message to a system error message. Deletion of a system error message has been disallowed. The message however, can be moved, copied, or renamed.</i></p> <p><i>Check the application indicated, and correct the error.</i></p>
NAT4898	<p><i>Ungültige Fehlernummer für 'Rename'.</i></p> <p><i>Invalid error number specified for 'rename'.</i></p> <p><i>When renaming (renumbering) error messages, all error number specifications (ERROR FM, ERROR TO, NEW ERROR FM, NEW ERROR TO) must be numeric and follow the rules listed below:</i></p> <p class="list-item-l1">1) <i>THE numbers must be in the correct combination as follows:</i></p> <p class="list-item-l2">A) <i>only ERROR FM.</i></p> <p class="list-item-l2">B) <i>ERROR FM and ERROR TO.</i></p> <p class="list-item-l2">C) <i>ERROR FM and NEW ERROR FM.</i></p> <p class="list-item-l2">D) <i>ERROR FM, ERROR TO, NEW ERROR FM and NEW ERROR TO.</i></p> <p class="list-item-l1">2) <i>If the range notation is used, the NEW ERROR FM must be by least 2 higher than the THE ERROR FM.</i></p> <p class="list-item-l1">3) <i>If the range notation is used, the difference between ERROR and ERROR TO must be the same as NEW ERROR FM and NEW ERROR TO.</i></p> <p><i>Correct the error.</i></p>
NAT4899	<p><i>Diese Funktion geht bei VSAM-Systemdateien nicht.</i></p> <p><i>This feature is not implemented for VSAM system file.</i></p> <p><i>To use this feature, a NATURAL system file is required that is contained within an ADABAS database.</i></p> <p><i>Select another feature.</i></p>
NAT4900	<p><i>Sie dürfen nicht mehr als 40 Namen angeben.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Too many names specified.</i></p> <p><i>For the commands UNCATALOG, PURGE and SCRATCH, a list of up to 40 names of NATURAL modules/programs may be entered for deletion</i></p> <p><i>Reduce number of names.</i></p>
NAT4901	<p><i>Die Eingabedaten sind im Batch-Betrieb nicht zulässig.</i></p> <p><i>Invalid data for batch environment.</i></p> <p><i>In a batch environment, the input for an UNCATALOG/PURGE/SCRATCH can only consist of a list of names for NATURAL modules/programs</i></p> <p><i>At least 1 name must be entered. A maximum of 40 names can be entered. Asterisk notation is not permitted.</i></p> <p><i>Enter one or more valid names.</i></p>
NAT4902	<p><i>Es ist nur ein 'Generic Key' pro Aufruf erlaubt.</i></p> <p><i>Only one generic key permitted.</i></p> <p><i>Only one generic key is permitted per invocation of the UNCAT/PU SCRATCH command.</i></p> <p><i>A generic key is a character string, which may be empty, truncat asterisk.</i></p> <p><i>The use of a generic key results in the display of a menu which contains all modules/programs starting with the character string</i></p> <p><i>These modules/programs may be marked for further processing.</i></p> <p><i>Enter valid data.</i></p>
NAT4903	<p><i>Entweder Namensliste oder *-Notation, aber nicht beides.</i></p> <p><i>Do not use both, list of names and asterisk notation.</i></p> <p><i>For the UNCATALOG/PURGE/SCRATCH commands, you can either enter a</i></p> <p><i>of NATURAL module/program names or use asterisk notation, but no</i></p> <p><i>Correct error.</i></p>
NAT4904	<p><i>Keine Module/Programme in der aktuellen Library gefunden.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>No module(s)/program(s) found in current library.</i></p> <p><i>No module/program was found which meets the search criteria.</i></p> <p><i>Make sure that the correct search criteria were used.</i></p>
NAT4905	<p><i>Neuer Fehlerbereich darf den aktuellen nicht überlappen.</i></p> <p><i>New error range may not overlap the current error range.</i></p> <p><i>When renumbering (renaming) ranges of errors, overlaps of ranges permitted within the same application (for reasons of data integ</i></p> <p><i>The NEW ERROR FROM must be smaller than the original ERROR FROM greater than the original ERROR TO. Example:</i></p> <p><i>When renumbering errors 10 to 20 as 13 to 23; number 10 would moved to 13, but 13 would be moved to 17, and 17 would be mov 20, etc.; thus, error number 10 would be duplicated.</i></p> <p><i>If the NEW ERROR FROM were smaller than 10 or greater than 20 would not occur.</i></p> <p><i>If you cannot avoid overlapping with the ranges of numbers avail you, renumber the errors to a dummy application and then from th application to the original application.</i></p> <p><i>Chek the error numbers and the application, and correct the err</i></p>
NAT4906	<p><i>User Exit wurde aufgerufen, existiert aber nicht mehr.</i></p> <p><i>User exit was invoked but no longer exists.</i></p> <p><i>At initialization of SYSMAIN, the user exit 1 and/or 2 was activ but during processing the user exit could not be invoked. This m occur if the catalogued object is not catalogued in the SYSMAIN li</i></p> <p><i>No action required. SYSMAIN will no longer invoke the user exit caused the error.</i></p>
NAT4907	<p><i>PREDICT-Dateien für XREF=Y oder XREF=F nicht gültig.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>PREDICT file invalid for processing of XREF data.</i></p> <p><i>When XREF data are processed (XREF parameter set to 'Y', 'F' or the PREDICT (FDIC) file must be a valid file for PREDICT Version above. (With SYSMAIN, you may use the command 'SET FDIC' to over the current PREDICT file setting.)</i></p> <p><i>This error also appears if you are processing sets and the FDIC is not a valid PREDICT file.</i></p> <p><i>Use a valid PREDICT file, or set the XREF indicator to 'N', or set the set number to '0'.</i></p>
NAT4909	<p><i>Entweder *-Notation oder Namensliste, aber nicht beides.</i></p> <p><i>Do not enter both, asterisk notation and list of names.</i></p> <p><i>For the UNCATALOG/PURGE/SCRATCH commands, you can either enter a of NATURAL module/program names or use asterisk notation, but no</i></p> <p><i>Correct error.</i></p>
NAT4910	<p><i>Objekt ist durch PREDICT APPLICATION CONTROL geschützt.</i></p> <p><i>Object is protected by PREDICT APPLICATION CONTROL.</i></p> <p><i>You cannot maintain the selected object because it is under the control of PREDICT APPLICATION CONTROL.</i></p> <p><i>Contact your PREDICT APPLICATION CONTROL administrator.</i></p>
NAT4911	<p><i>Set :1: ist hier nicht vorhanden.</i></p> <p><i>Set ... cannot be found.</i></p> <p><i>The specified set cannot be found.</i></p> <p><i>Make sure that you have specified the correct User, Library, Library DBID/FNR, FDIC DBID/FNR, and Set Number.</i></p>

Natural Fehlermeldungen 3.1.1

NAT4912	<p><i>PC Download must be 'Y' or 'N'.</i></p>
	<p><i>PC Download must be 'Y' or 'N'.</i></p> <p><i>When you export/download NATURAL objects to a PC, this option must be set to either 'Y' (export) or 'N' (normal processing).</i></p> <p><i>Specify correct value.</i></p>
NAT4913	<p><i>Work files 6 + 7 must be assigned to PCNEW for download.</i></p>
	<p><i>Work files 6 + 7 must be assigned to PCNEW for download.</i></p> <p><i>When you use the PC Download option, work files 6 and 7 must be assigned to PCNEW.</i></p> <p><i>Assign work files 6 and 7.</i></p>

Natural Fehlermeldungen 3.1.1

	<p>NAT9926 Session not in rolled-in status.</p> <p><i>The frontend server stub requested a session roll-out, execute or save clone function, but the session is not in rolled-in state.</i></p> <p>Contact SAG technical support for further problem analysis.</p>
NAT9927	<p>NAT9927 Session not in rolled-out status.</p> <p><i>The frontend server stub requested a session roll-in function, but the session is not in rolled-out state.</i></p> <p>Contact SAG technical support for further problem analysis.</p>
NAT9928	<p>NAT9928 Compression failed during roll-out. RC=:1:.</p> <p><i>The Natural thread storage compression failed. The exact reason is indicated by the decimal return code RC=00nn. It is explained in the Natural documentation.</i></p> <p>Contact SAG technical support for further problem analysis.</p>
NAT9929	<p>NAT9929 Decompression failed during roll-in. RC=:1:.</p> <p><i>The Natural thread storage decompression failed. The exact reason is indicated by the decimal return code RC=00nn. It's explained in the Natural documentation.</i></p> <p>Contact SAG technical support for further problem analysis.</p>
NAT9930	<p>NAT9930 GETMAIN failed for roll buffer.</p>

Natural Fehlermeldungen 3.1.1

	<p>NAT9930 GETMAIN failed for roll buffer.</p> <p><i>During Natural session thread storage roll-out the GETMAIN request for the roll buffer failed. Sufficient region storage must be available to save the compressed session storage.</i></p> <p><i>Increase the region size for the Natural server or use the Natural roll server as roll facility.</i></p>
NAT9931	<p>NAT9931 The AUTOTERM facility cannot be initialized.</p> <p>NAT9931 The AUTOTERM facility cannot be initialized.</p> <p><i>In a Natural server environment, the automatic server termination facility helps to avoid problems caused by an unintended DETACH of the server initialization TCB (e.g. MVS abends A03, no server re cleanup etc.). The AUTOTERM facility cannot be initialized due to storage protection problems.</i></p> <p><i>Disable the AUTOTERM facility in the frontend server stub definition or contact SAG technical support for further problem analysis.</i></p>
NAT9932	<p>NAT9932 Natural runtime error occurred - :1:.</p> <p>NAT9932 Natural runtime error occurred - :1:.</p> <p><i>During the execution of a Natural server session the indicated Natural runtime error NATnnnn occurred.</i></p> <p><i>Read the full runtime error message issued by Natural. It can be either found in the return data on the client side or in the Natural standard output dataset CMPPRINT of the server.</i></p>
NAT9933	<p>NAT9933 Roll server ALLOCATE request failed. RC=:1:/:2:.</p> <p>NAT9933 Roll server ALLOCATE request failed. RC=:1:/:2:.</p> <p><i>During session creation the ALLOCATE request for a new roll file failed. Sufficient roll file storage must be available. The reasons for the failure is indicated by the decimal return/reason codes. are explained in the Natural documentation.</i></p> <p><i>If you cannot find the reason for the problem and correct it, contact SAG technical support for further problem analysis.</i></p>

Natural Fehlermeldungen 3.1.1

NAT9934	<p>NAT9934 Roll server WRITE request failed. RC=:1:/:2:.</p> <p>NAT9934 Roll server WRITE request failed. RC=:1:/:2:.</p> <p><i>During session roll-out the WRITE request to the Natural roll se failed. The reason for the failure is indicated by the decimal return/reason codes. These are explained in the Natural document</i></p> <p><i>If you cannot find the reason for the problem and correct it, co SAG technical support for further problem analysis.</i></p>
NAT9935	<p>NAT9935 Roll server READ request failed. RC=:1:/:2:.</p> <p>NAT9935 Roll server READ request failed. RC=:1:/:2:.</p> <p><i>During session roll-in the READ request from the NATURAL roll se failed. The reason for the failure is indicated by the decimal return/reason codes. These are explained in the Natural Document</i></p> <p><i>If you cannot find the reason for the problem and correct it, co SAG technical support for further problem analysis.</i></p>
NAT9936	<p>NAT9936 Roll server FREE request failed. RC=:1:/:2:.</p> <p>NAT9936 Roll server FREE request failed. RC=:1:/:2:.</p> <p><i>During session termination the FREE request to the Natural roll server failed. The reason for the failure is indicated by the decimal return/reason codes. These are explained in the Natural documentation.</i></p> <p><i>If you cannot find the reason for the problem and correct it, co SAG technical support for further problem analysis.</i></p>
NAT9937	<p>NAT9937 Server I/O subtask cannot be started. RC=:1:/:2:.</p>

Natural Fehlermeldungen 3.1.1

	<p>NAT9937 Server I/O subtask cannot be started. RC=:1:/:2:.</p> <p><i>In the Natural server environment, the whole I/O handling is done by a separate MVS subtask, started during server initialization. ATTACH request for the I/O subtask failed. The reason for the failure is indicated by RC=nnnn/xxxx, where nnnn is the decimal return code of the internal function code xxxx.</i></p> <p><i>Contact SAG technical support for further problem analysis.</i></p>
NAT9969	<p>NATURAL nach Fehlerschleife abgebrochen - nnnn NATnnnn.</p> <p>NATURAL escaped from error loop - nnnn NATnnnn.</p> <p><i>An error loop has occurred, and NATURAL has been terminated. '.....' - is the name of the program which caused the error. 'nnnn' - is the number of the source-code line which caused error. 'NATnnnn' - is the number of the last error which occurred before NAT9969 was issued.</i></p> <p><i>If the parameter DU=ON is set, a dump will be produced. Register the dump contains the number of the last error which occurred before NATURAL escaped from the error loop and issued NAT9969.</i></p> <p><i>Produce a dump with DU=ON, and correct error; if necessary, contact Software AG support.</i></p>
NAT9974	<p>NATURAL-Abbruch aufgrund von Abbruchbedingung</p> <p>NATURAL termination forced by abend</p> <p><i>NATURAL has been abnormally terminated after an abend condition occurred, and the profile parameter DU=ON was set:</i></p> <p><i>Possible abend conditions are, for example:</i></p> <p><i>'S0C7' - data exception,</i></p> <p><i>'AICA' - possible loop under CICS,</i></p> <p><i>'ATCH' - task cancelled by operator (CICS).</i></p> <p><i>Analyse the dump which has been produced, and correct error. If necessary, contact Software AG support.</i></p>
NAT9975	<p>Folgeprogramm nicht gefunden -</p>

Natural Fehlermeldungen 3.1.1

	<p><i>Back-end program not found -</i></p> <p><i>The NATURAL session was terminated normally, but the program ' .. which was to receive control after the session termination (as specified with the profile parameter PROGRAM) could not be f</i></p> <p><i>Make sure the correct program name is specified with the PROGRAM parameter, and that the program is contained in the appropriate library.</i></p>
NAT9976	<p><i>Initialisierungspuffer zu klein.</i></p> <p><i>Initialization buffer too small.</i></p> <p><i>NATURAL could not be initialized because there was not enough space in the initialization buffer. The size of this buffer is determined by the profile parameter ISIZE.</i></p> <p><i>Increase value for ISIZE parameter in the NATURAL parameter module, then start NATURAL session again.</i></p>
NAT9977	<p><i>Ständiger I/O-Fehler bei Eingabeverarbeitung.</i></p> <p><i>Permanent I/O error during input processing.</i></p> <p><i>During batch processing, NATURAL did not receive any input data.</i></p> <p><i>Make sure input data are passed correctly to NATURAL.</i></p>
NAT9978	<p><i>Fehler während Programmkomplilierung/-ausführung.</i></p> <p><i>Error occurred during execution/compilation.</i></p> <p><i>During NATURAL batch processing, an error has occurred when a program was being compiled or executed. Batch processing was continued after the error. The session was terminated with return code '4'.</i></p> <p><i>Check the output protocol for any error messages.</i></p> <p><i>Correct the error, and re-run the batch job if necessary.</i></p>
NAT9979	<p><i>Terminal-Konverter-Modul ist nicht gelinkt.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Terminal converter module not linked.</i></p> <p><i>NATURAL was invoked at a type of terminal which cannot be supported because the corresponding converter module for this terminal type has not been linked to the NATURAL nucleus.</i></p> <p><i>Link the missing module to the NATURAL nucleus, then invoke NATURAL again.</i></p>
NAT9980	Gewünschte Buffer-Pool-Große ist nicht ausreichend. <i>Requested buffer pool size too small.</i> <i>The buffer pool manager tried to become active, but was assigned a buffer pool size which is less than the minimum size required to function properly.</i> <i>Restart NATURAL with increased size of parameter NBPMSIZE.</i>
NAT9981	Zuwenig Buffer Pool Directories angegeben. <i>Specified number of buffer pool directories too small.</i> <i>The NATURAL buffer pool manager tried to initialize with a number of directory elements which is too small to guarantee proper functioning of the buffer pool.</i> <i>Restart NATURAL with increased number of directory entries (parameter NBPMDIRS).</i>
NAT9982	Platz für Directory im Buffer Pool nicht ausreichend. <i>Not enough space to allocate directory in buffer pool.</i> <i>The NATURAL buffer pool manager tried to initialize but failed to allocate space for the number of directory elements specified.</i> <i>Restart NATURAL with fewer directory elements (parameter NBPMDIR).</i>
NAT9983	Speicherplatz für Buffer Pool wurde nicht zugewiesen.

Natural Fehlermeldungen 3.1.1

	<p><i>Memory allocation for buffer pool failed.</i></p> <p><i>The NATURAL buffer pool manager tried to initialize the buffer pool but failed to allocate the requested amount of storage from the TP monitor or operating system.</i></p> <p><i>Perhaps the amount of storage reserved for the TP monitor or bat in the executing partition/region should be reduced.</i></p> <p><i>Restart with a smaller size (parameter NBMPSIZE).</i></p>
NAT9984	<p><i>Textelement-Große im Buffer Pool muß 1, 2 oder 4 KB sein.</i></p> <p><i>Buffer pool text element size can only be 1, 2, or 4 KB.</i></p> <p><i>The NATURAL buffer pool manager tried to initialize, and found that the requested size for the text blocks of the NATURAL program is not 1, 2 or 4 KB.</i></p> <p><i>Apply ZAP again with correct size value.</i></p>
NAT9985	<p><i>Initialisierungsroutine für Buffer Pool ist nicht gelinkt.</i></p> <p><i>Initialization routine for buffer pool not linked.</i></p> <p><i>The NATURAL buffer pool manager tried to initialize, but could not find the initialization routine.</i></p> <p><i>Relink the NATURAL buffer pool manager correctly.</i></p>
NAT9986	<p><i>NATURAL-Parametermodul fehlt oder ist fehlerhaft.</i></p> <p><i>NATURAL parameter module missing or invalid.</i></p> <p><i>Either no NATURAL parameter module has been linked to the NATURAL nucleus, or the parameter module linked contains an error.</i></p> <p><i>Re-assemble NATURAL parameter module using the correct macro lib and link it to the NATURAL nucleus.</i></p>
NAT9987	<p><i>NATURAL-Session mit Return Code abgebrochen - RC=nnn.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>NATURAL session terminated abnormally - RC=nnn.</i></p> <p><i>The NATURAL session was terminated by a TERMINATE statement with code 'nnn' in a NATURAL program.</i></p> <p><i>No action required.</i></p>
NAT9988	<p><i>Die Systemdatei-Informationen sind ungültig.</i></p> <p><i>Invalid system file information.</i></p> <p><i>The database ID and/or file number of the NATURAL system file FN have been changed, but the NATURAL system environment has not been adjusted to this change.</i></p> <p><i>Use function 'A' of the INPL utility to adjust the system environment.</i></p>
NAT9989	<p><i>Die NATURAL-Versionen stimmen nicht überein.</i></p> <p><i>NATURAL versions do not agree.</i></p> <p><i>During initialization, NATURAL checks whether the versions of the environment-dependent interface, the NATURAL nucleus and the NAT parameter module fit together.</i></p> <p><i>Re-assemble the parameter module and/or the interface, and re-link the NATURAL nucleus.</i></p>
NAT9990	<p><i>NATURAL konnte nicht initialisiert werden.</i></p> <p><i>NATURAL initialization failed.</i></p> <p><i>During initialization of NATURAL, an error condition occurred which does not allow for continuation of the NATURAL session.</i></p> <p><i>This message is preceded by one or more other NATURAL error messages.</i></p> <p><i>Correct error as indicated by preceding error messages.</i></p>
NAT9991	<p><i>Erforderliches Modul ist nicht gelinkt - xxxxxxxx.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Required module not linked - xxxxxxxx.</i></p> <p><i>During initialisation of NATURAL, it was detected that the modul whose name is indicated in the error message is missing from the NATURAL nucleus.</i></p> <p><i>Link the missing module to the NATURAL nucleus; then start NATUR again.</i></p>
NAT9992	<p><i>Nicht wiederherstellbarer Abbruch - Session beendet.</i></p>
	<p><i>Unrecoverable abend - session terminated.</i></p> <p><i>During the attempt to recover the NATURAL session after an abend another abend has occurred; the NATURAL session was terminated.</i></p> <p><i>Analyse the dump which has been produced, and correct error. If necessary, contact Software AG support.</i></p>
NAT9993	<p><i>Fehlendes oder ungültiges ADABAS-Link-Modul - :1:.</i></p>
	<p><i>ADABAS link module missing or invalid - ...</i></p> <p><i>The ADABAS link module specified by profile parameter ADANAME cannot be loaded or is invalid. Either the load library is missing or invalid or the specified module either doesn't exist or has been linked incorrectly.</i></p> <p><i>Ensure that the correct load library is attached to the NATURAL session and that it contains the correct ADABAS link module.</i></p>
NAT9994	<p><i>Kette der dynamischen Parameter ist zu lang.</i></p>
	<p><i>String of dynamic parameters is too long.</i></p> <p><i>The character string supplied as dynamic parameters at the start the NATURAL session was too long.</i></p> <p><i>The string of dynamic parameters must not exceed 32767 character</i></p> <p><i>Restart the NATURAL session with fewer dynamic parameters.</i></p>
NAT9995	<p><i>Die NATURAL-Session wurde normal beendet.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>NATURAL session terminated normally.</i></p> <p><i>The NATURAL session for this terminal/user was terminated without any error conditions.</i></p> <p><i>NATURAL was terminated by one of the following actions:</i></p> <ul style="list-style-type: none"><i>- entering the command FIN in NEXT/MORE mode,</i><i>- entering the command %% in NEXT mode,</i><i>- pressing the CLEAR key in NEXT mode,</i><i>- executing the statement TERMINATE in a NATURAL program.</i> <p><i>No action required.</i></p>
NAT9996	<p><i>Das NATURAL-Modul '.....' kann nicht geladen werden.</i></p> <p><i>Unable to load NATURAL module '.....'.</i></p> <p><i>NATURAL could not load its reentrant part '.....'.</i></p> <p><i>NATURAL attempts a TP- or OS-dependent load to pass control to its reentrant part. If it is not linked and received an error condition from the load, this error message will appear.</i></p> <p><i>This error may also occur if the shared NATURAL nucleus cannot be located, or it resides above 16 MB while the TP interface was not generated to support 31-bit mode.</i></p> <p><i>Check module name, and either apply (ZAP) new name or re-link the reentrant part with a corresponding name.</i></p>
NAT9997	<p><i>Zuwenig Speicher, um NATURAL zu starten - tt/nnn/rr.</i></p>

Natural Fehlermeldungen 3.1.1

	<p><i>Not enough memory to start NATURAL - ttt... nnnK RC=rr.</i></p> <p><i>NATURAL was not able to acquire all required storage buffers. These buffers are used for user area, terminal area, I/O areas, file buffers, etc. If one of the storage acquisition calls fails NATURAL cannot be initialized.</i></p> <p><i>'ttt...' - buffer type (as documented in NATCONFIG),</i> <i>'nnnK' - buffer size (in KB),</i> <i>'rr' - return code from the GETMAIN request as follows:</i></p> <ul style="list-style-type: none"><i>- 04 = not enough storage</i><i>08 = invalid buffer type</i><i>10 = duplicate buffer type</i><i>18 = invalid buffer length</i><i>1C = buffer type not defined in NATCONFIG</i><i>30 = module NATCONFIG not linked</i><i>34 = physical GETMAIN failed</i> <p><i>RC=04/34: reduce buffer sizes or assign a larger thread/partition The other return codes indicate a product error; contact SAG sup</i></p>
NAT9998	<p><i>E/A-Fehler in der Eingabedatei CMOBJIN.</i></p> <p><i>I/O error on CMOBJIN input file.</i></p> <p><i>An I/O error occurred while data were being read from the CMOBJIN input file.</i></p> <p><i>Contact your database administrator.</i></p>
NAT9999	<p><i>E/A-Fehler in der Eingabedatei CMSYNIN.</i></p> <p><i>I/O error on CMSYNIN input file.</i></p> <p><i>An I/O error occurred while data were being read from the CMSYNIN input file.</i></p> <p><i>Contact your NATURAL administrator.</i></p>
